(57) **CLAIM**

The ornamental design for a bottle wrap, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a first embodiment of a bottle wrap showing the new design. The rear elevational view of the first embodiment is identical.

FIG. 2 is a right side elevational view of the first embodiment. The left side elevational view of the first embodiment is identical.

FIG. 3 is a front elevational view of the first embodiment thereof, with a bottle (not shown) disposed within and an upper portion of the bottle wrap extending in a fan shape. The rear elevational view of the first embodiment is identical.

FIG. 4 is a right side elevational view of a partially open variant of the first embodiment, with the bottle (not shown) disposed within. The left side elevational view of the partially open variant of the first embodiment is identical.

FIG. 5 is a front perspective view of the partially open variant of the first embodiment, with the bottle (not shown) disposed within. A rear perspective view of the partially open variant of the first embodiment is identical.

FIG. 6 is a front perspective view of a fully open variant of the first embodiment, with the bottle (not shown) disposed within. A rear perspective view of the fully open variant of the first embodiment is identical.

FIG. 7 is a right side elevational view of the fully open variant of the first embodiment, with the bottle (not shown) disposed

within. The left side elevational view of the fully open variant of the first embodiment is identical.

FIG. 8 is a top plan view of the partially open variant of the first embodiment, having a bottle (shown in broken lines) disposed within.

FIG. 9 is a bottom plan view of the first embodiment.

FIG. 10 is a side perspective view of the fully open variant of the first embodiment, with the top portion of the bottle wrap opened and showing the bottle disposed within (shown in broken lines).

FIG. 11 is an upper side perspective view of the fully open variant of the first embodiment, having the top portion of the bottle wrap pulled tightly around an upper portion of the bottle disposed within (not shown).

FIG. 12 is a front elevational view of the of the fully open variant of the first embodiment, having the top portion of the bottle wrap pulled tightly around an upper portion of the bottle disposed within (not shown). The rear elevation view of the fully open variant of the first embodiment is identical.

FIG. 13 is a top plan view of the fully open variant of the first embodiment, having the top portion of the bottle wrap pulled tightly around an upper portion of the bottle disposed within (shown in broken lines).

FIG. 14 is a front elevational view of a second embodiment of a bottle wrap showing the new design. The rear elevational view of the second embodiment is identical.

FIG. 15 is a right side elevational view of the second embodiment. The left side elevational view of the second embodiment is identical.

FIG. 16 is a front elevational view of the second embodiment thereof, with a bottle (not shown) disposed within and an upper portion of the bottle wrap extending in a fan shape. The rear elevational view of the second embodiment is identical.

FIG. 17 is a right side elevational view of a partially open variant of the second embodiment, with the bottle (not shown) disposed within. The left side elevational view of the partially open variant of the second embodiment is identical.

FIG. 18 is a front perspective view of the partially open variant of the second embodiment, with the bottle (not shown) disposed within. A rear perspective view of the partially open variant of the second embodiment is identical.

FIG. 19 is a front perspective view of a fully open variant of the second embodiment, with the bottle (not shown) disposed within. A rear perspective view of the fully open variant of the second embodiment is identical.

FIG. 20 is a right side elevational view of the fully open variant of the second embodiment, with the bottle (not shown) disposed within. The left side elevational view of the fully open variant of the second embodiment is identical.

FIG. 21 is a top plan view of the partially open variant of the second embodiment, having a bottle (shown in broken lines) disposed within.

FIG. 22 is a bottom plan view of the second embodiment.

FIG. 23 is an upper side perspective view of the fully open variant of the second embodiment, having the top portion of the bottle wrap pulled tightly around an upper portion of the bottle disposed within (not shown).

FIG. 24 is a front elevational view of the of the fully open variant of the second embodiment, having the top portion of the bottle wrap pulled tightly around an upper portion of the bottle disposed within (not shown). The rear elevation view of the fully open variant of the second embodiment is identical.

FIG. 25 is a side perspective view of the fully open variant of the second embodiment, with the top portion of the bottle wrap opened and showing the bottle disposed within (shown in broken lines); and,

FIG. 26 is a top plan view of the fully open variant of the second embodiment, having the top portion of the bottle wrap pulled tightly around an upper portion of the bottle disposed within (shown in broken lines).

The broken lines shown in the drawings are for illustrative purposes only and form no part of the claimed design. The broken lines are used to depict an example of a bottle that may be disposed within the bottle wrap.
