See application file for complete search history.

(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with transitional graphical user interface showing my new design;
FIG. 2 is a front view thereof showing a first image in the sequence, but shown without the broken line illustration of alternate positions;
FIG. 3 is a front view thereof showing a second image in the sequence;
FIG. 4 is a front view thereof showing a third image in the sequence;
FIG. 5 is a front view thereof showing a fourth image in the sequence;
FIG. 6 is a front view thereof showing a fifth image in the sequence; and,
FIG. 7 is a front view thereof showing a sixth image in the sequence.

The outer rectangle in broken lines is included to show an unclaimed portion of a display screen and forms no part of the claimed design. The portions of the transitional graphical user interface shown in broken lines forms no part of the claimed design.

The subject matter of this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
