US00D697491S

(12) United States Design Patent

Daniel

(10) Patent No.: US D697,491 S
(45) Date of Patent: ** *Jan. 14, 2014

(54) **COMMUNICATION DEVICE WITH CONCEALED BIOMETRIC VERIFICATION MEANS**

(76) Inventor: **Isaac S. Daniel**, Miramar, FL (US)

(*) Notice: This patent is subject to a terminal disclaimer.

(**) Term: **14 Years**

(21) Appl. No.: **29/415,019**

(22) Filed: **Mar. 6, 2012**

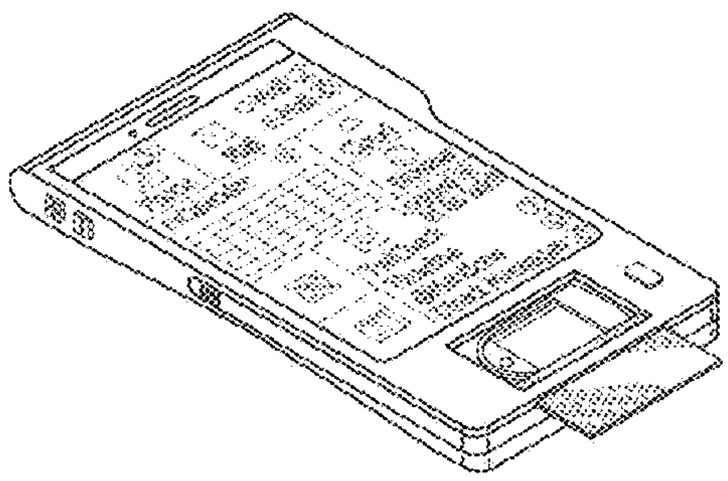
(57) **CLAIM**

The ornamental design for a communication device with concealed biometric verification means, as shown and described.

DESCRIPTION

FIG. **1** is a front, bottom, left perspective view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **2** is a front, bottom, left perspective view of the invention with the cover for the concealed biometric verification means in the open position.



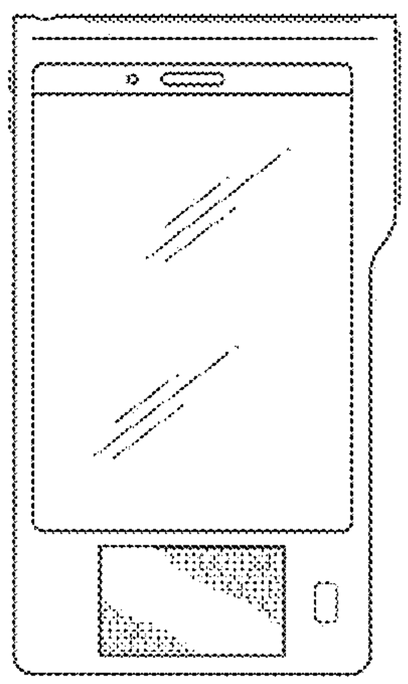


FIG. **3** is a front, top, right perspective view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **4** is a front, top, right perspective view of the invention with the cover for the concealed biometric verification means in the open position.

FIG. **5** is a rear, top, left perspective view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **6** is a rear, top, left perspective view of the invention with the cover for the concealed biometric verification means in the open position.

FIG. **7** is a front view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **8** is a front view of the invention with the cover for the concealed biometric verification means in the open position.

FIG. **9** is a rear view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **10** is a rear view of the invention with the cover for the concealed biometric verification means in the open position.

FIG. **11** is a left side view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **12** is a left side view of the invention with the cover for the concealed biometric verification means in the open position.

FIG. **13** is a right side view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **14** is a right side view of the invention with the cover for the concealed biometric verification means in the open position.

FIG. **15** is a top plan view of the invention with the cover for the concealed biometric verification means in the closed position.

FIG. **16** is a top plan view of the invention with the cover for the concealed biometric verification means in the open position.

FIG. **17** is a bottom plan view of the invention with the cover for the concealed biometric verification means in the closed position; and,

FIG. **18** is a bottom plan view of the invention with the cover for the concealed biometric verification means in the open position.

The broken lines showing displayed information in FIGS. **1** and **2** are directed to environment and are for illustrative purposes only; the broken lines form no part of the claimed design.
