This invention provides a novel unobvious and non-functional design of an article of manufacture identified as a portion of a display screen with an icon showing the entity of my new design as a portion of a display screen with an icon, which is described, claimed and shown with a red scan code submitted originally to which the application has been reverted. The icon is a sign having symbols, images and representations in a particular style with black and red design elements, including the word "Cosential" in a motto as part of the design under 35 U.S.C. 171 and MPEP 1509.
