Primary Examiner — Antoine D Davis

(57) **CLAIM**

The ornamental design for a portable hand held rechargeable trailer light, as shown.

DESCRIPTION

FIG. 1 is a Top elevational view my design, entitled portable hand held rechargeable trailer light checker
FIG. 2 is a left side elevational view of my design thereof;
FIG. 3 is a right side elevational view of my design thereof;
FIG. 4 is a bottom plan view of my design thereof; and,
FIG. 5 is a top to bottom plan view of the handle of my design thereof.

The claimed portable hand held rechargeable trailer light checker has seven switches that are used to provide a 12 volt DC power to the trailer's exterior lights—top and bottom clearance lights, left and right turn signals, brake lights, and auxiliary lights, such as the automatic breaking systems (ABS) and/or tire inflation systems. It verifies that the lights are operational according to the requirements of the Department of Transportation (DOT). The portable hand held rechargeable trailer light checker is a convenient way to troubleshoot and diagnose the trailer's exterior lights and auxiliary equipment when malfunctions occur.

1 Claim, 5 Drawing Sheets
