

US00D698860S

(12) **United States Design Patent**  
**Kurokawa et al.**

(10) **Patent No.:** **US D698,860 S**

(45) **Date of Patent:** **\*\* Feb. 4, 2014**

(54) **FLANGE FOR XEROGRAPHIC  
PHOTORECEPTOR**

(71) Applicant: **Fuji Electric Co., Ltd.**, Kawasaki (JP)

(72) Inventors: **Keiichi Kurokawa**, Kawasaki (JP); **Yuji Ogawa**, Kawasaki (JP)

(73) Assignee: **Fuji Electric Co., Ltd.**, Kawasaki-Shi, Kanagawa (JP)

(\*\*) Term: **14 Years**

(21) Appl. No.: **29/451,071**

(22) Filed: **Mar. 27, 2013**

(30) **Foreign Application Priority Data**

Sep. 28, 2012 (JP) ..... D 2012-023733

(51) **LOC (10) Cl.** ..... **16-03**

(52) **U.S. Cl.**  
USPC ..... **D18/43**

(57) **CLAIM**

The ornamental design for a flange for xerographic photoreceptor, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a flange for xerographic photoreceptor according to our new design;  
FIG. 2 is a rear view of the flange for xerographic photoreceptor of FIG. 1;  
FIG. 3 is a left side view of the flange for xerographic photoreceptor of FIG. 1;  
FIG. 4 is a right side view of the flange for xerographic photoreceptor of FIG. 1;  
FIG. 5 is a top view of the flange for xerographic photoreceptor of FIG. 1;  
FIG. 6 is a bottom view of the flange for xerographic photoreceptor of FIG. 1;  
FIG. 7 is a right side view of the flange for xerographic photoreceptor of FIG. 1 including cross-sectional indicia;  
FIG. 8 is a cross-sectional view of the flange for xerographic photoreceptor of FIG. 1 taken along line 8-8 of FIG. 7;  
FIG. 9 is a perspective view of the flange for xerographic photoreceptor of FIG. 1; and,  
FIG. 10 is a front view of the flange for xerographic photoreceptor of FIG. 1, shown at a reduced scale and in an alternate environment of use.

The broken lines depict environmental subject matter only and form no part of the claimed design.

The ornamental design of the present disclosure is a flange that can be fitted in an open end of a xerographic photoreceptor (also called a photoconductor drum). The xerographic photoreceptor can be incorporated in a process cartridge to be removably installed in electro-photographic application equipment, such as a copying machine, etc., and receives a rotational driving force from an apparatus main body. The xerographic photoreceptor is rotated by the rotational driving force to be transmitted to the flange to print a latent image of the xerographic photoreceptor on print media.
