(57) **CLAIM**

The ornamental design for a wrap assembly, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a wrap assembly showing the design in an unwrapped position;
 FIG. 2 is a top view of the wrap assembly of FIG. 1;
 FIG. 3 is a bottom view of the wrap assembly of FIG. 1;
 FIG. 4 is a front side view of the wrap assembly of FIG. 1;
 FIG. 5 is a right side view of the wrap assembly of FIG. 1;
 FIG. 6 is a perspective view of the wrap assembly showing the design in a partially wrapped position;
 FIG. 7 is a perspective view of the wrap assembly showing the design in a wrapped position;
 FIG. 8 is a top view of the wrap assembly of FIG. 7;
 FIG. 9 is a right side view of the wrap assembly of FIG. 7;
 FIG. 10 is a front side view of the wrap assembly of FIG. 7;
 and,
 FIG. 11 is a bottom view of the wrap assembly of FIG. 7.

The wrap assembly includes a wrap and a ribbon, as shown. Thus, the wrap and ribbon collectively form the wrap assembly. The left and back side views of the wrap assembly according to the present invention are duplicative of the right and front side views, respectively, and thus are omitted from the Specification. The broken lines illustrate portions of the design that form no part of the claim.
