(57) **CLAIM**

The ornamental design for a display panel or screen with graphical user interface, as shown and described.

DESCRIPTION

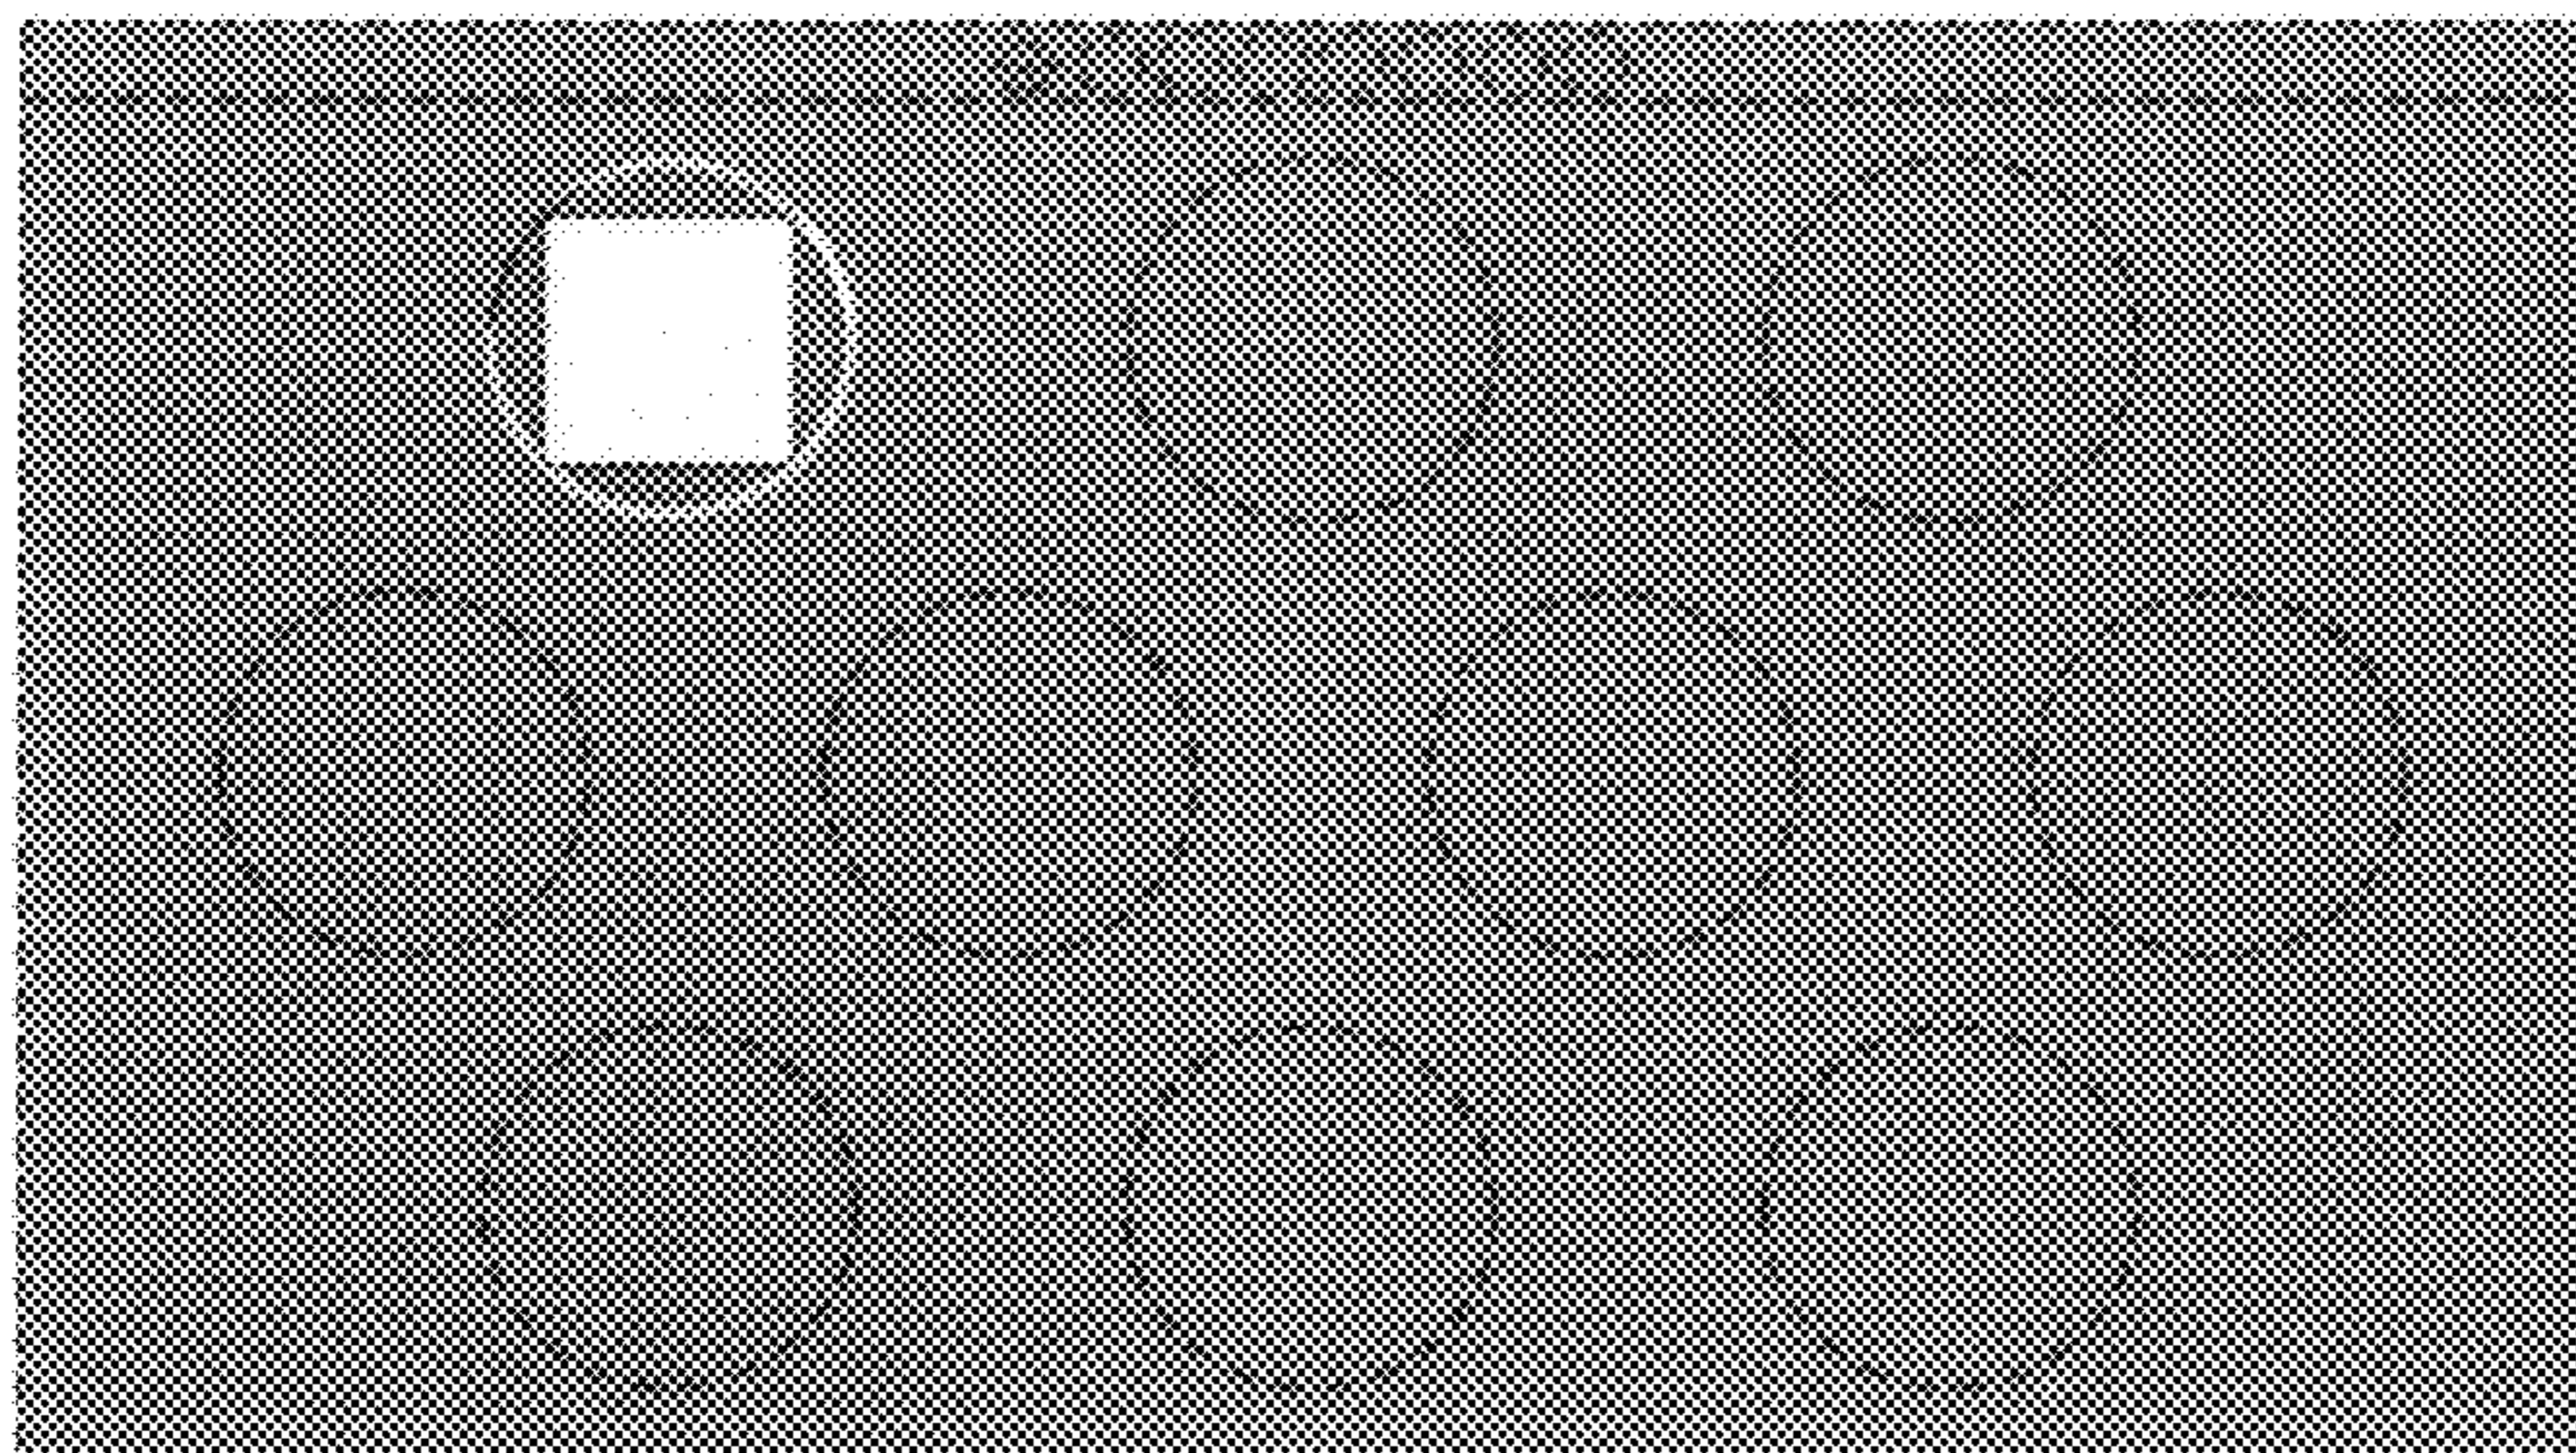

FIG. 1 is a front elevational view of a first embodiment of a display panel or screen with graphical user interface showing our new design; and,

FIG. 2 is a front elevational view of a second embodiment of a display panel or screen with graphical user interface showing our new design, wherein the image of FIG. 2 is an alternative image of the image of FIG. 1, in which an unclaimed background image shown in broken lines (letter "A") is overlapping with one (top row) of the circle images and an unclaimed square image within the circle image, as if the circle image and the square image look transparent or semi-transparent and as if one can see the background image through the one of the circle images and the square image, and in which another unclaimed background image shown in broken lines (letter "A") is overlapping with another one (middle row) of the circle images, as if the circle image looks opaque and as if one cannot see the background image through the another one of the circle images; and,

FIG. 3 is a front elevational view of a third embodiment of a display panel or screen with graphical user interface showing our new design, wherein the image of FIG. 3 is an alternative image of the image of FIG. 1 or FIG. 2 in which an unclaimed background image shown in broken lines (letter "A") is overlapping with one (top row) of the circle images and an unclaimed square image within the circle image, as if the circle looks transparent or semi-transparent and as if one can see the background image through the one of the circle images, but cannot see the background image through the square image as if the square image looks opaque, and in which another unclaimed background image shown in broken lines (letter "A") is overlapping with another one (middle row) of the circle images, as if the circle image looks opaque and as if one cannot see the background image through the another one of the circle images.

The broken lines showing of a display panel or screen and other elements form no part of the claimed design.

1 Claim, 3 Drawing Sheets
