(57) **CLAIM**

The ornamental design for a wireless electronic prototyping system, as shown and described.

**DESCRIPTION**

FIG. 1 is a front elevational view of the wireless electronic prototyping system showing a wireless breadboard.

FIG. 2 is a rear elevational view of the wireless electronic prototyping system showing an outer casing.

FIG. 3 is a left side elevational view of the wireless electronic prototyping system.

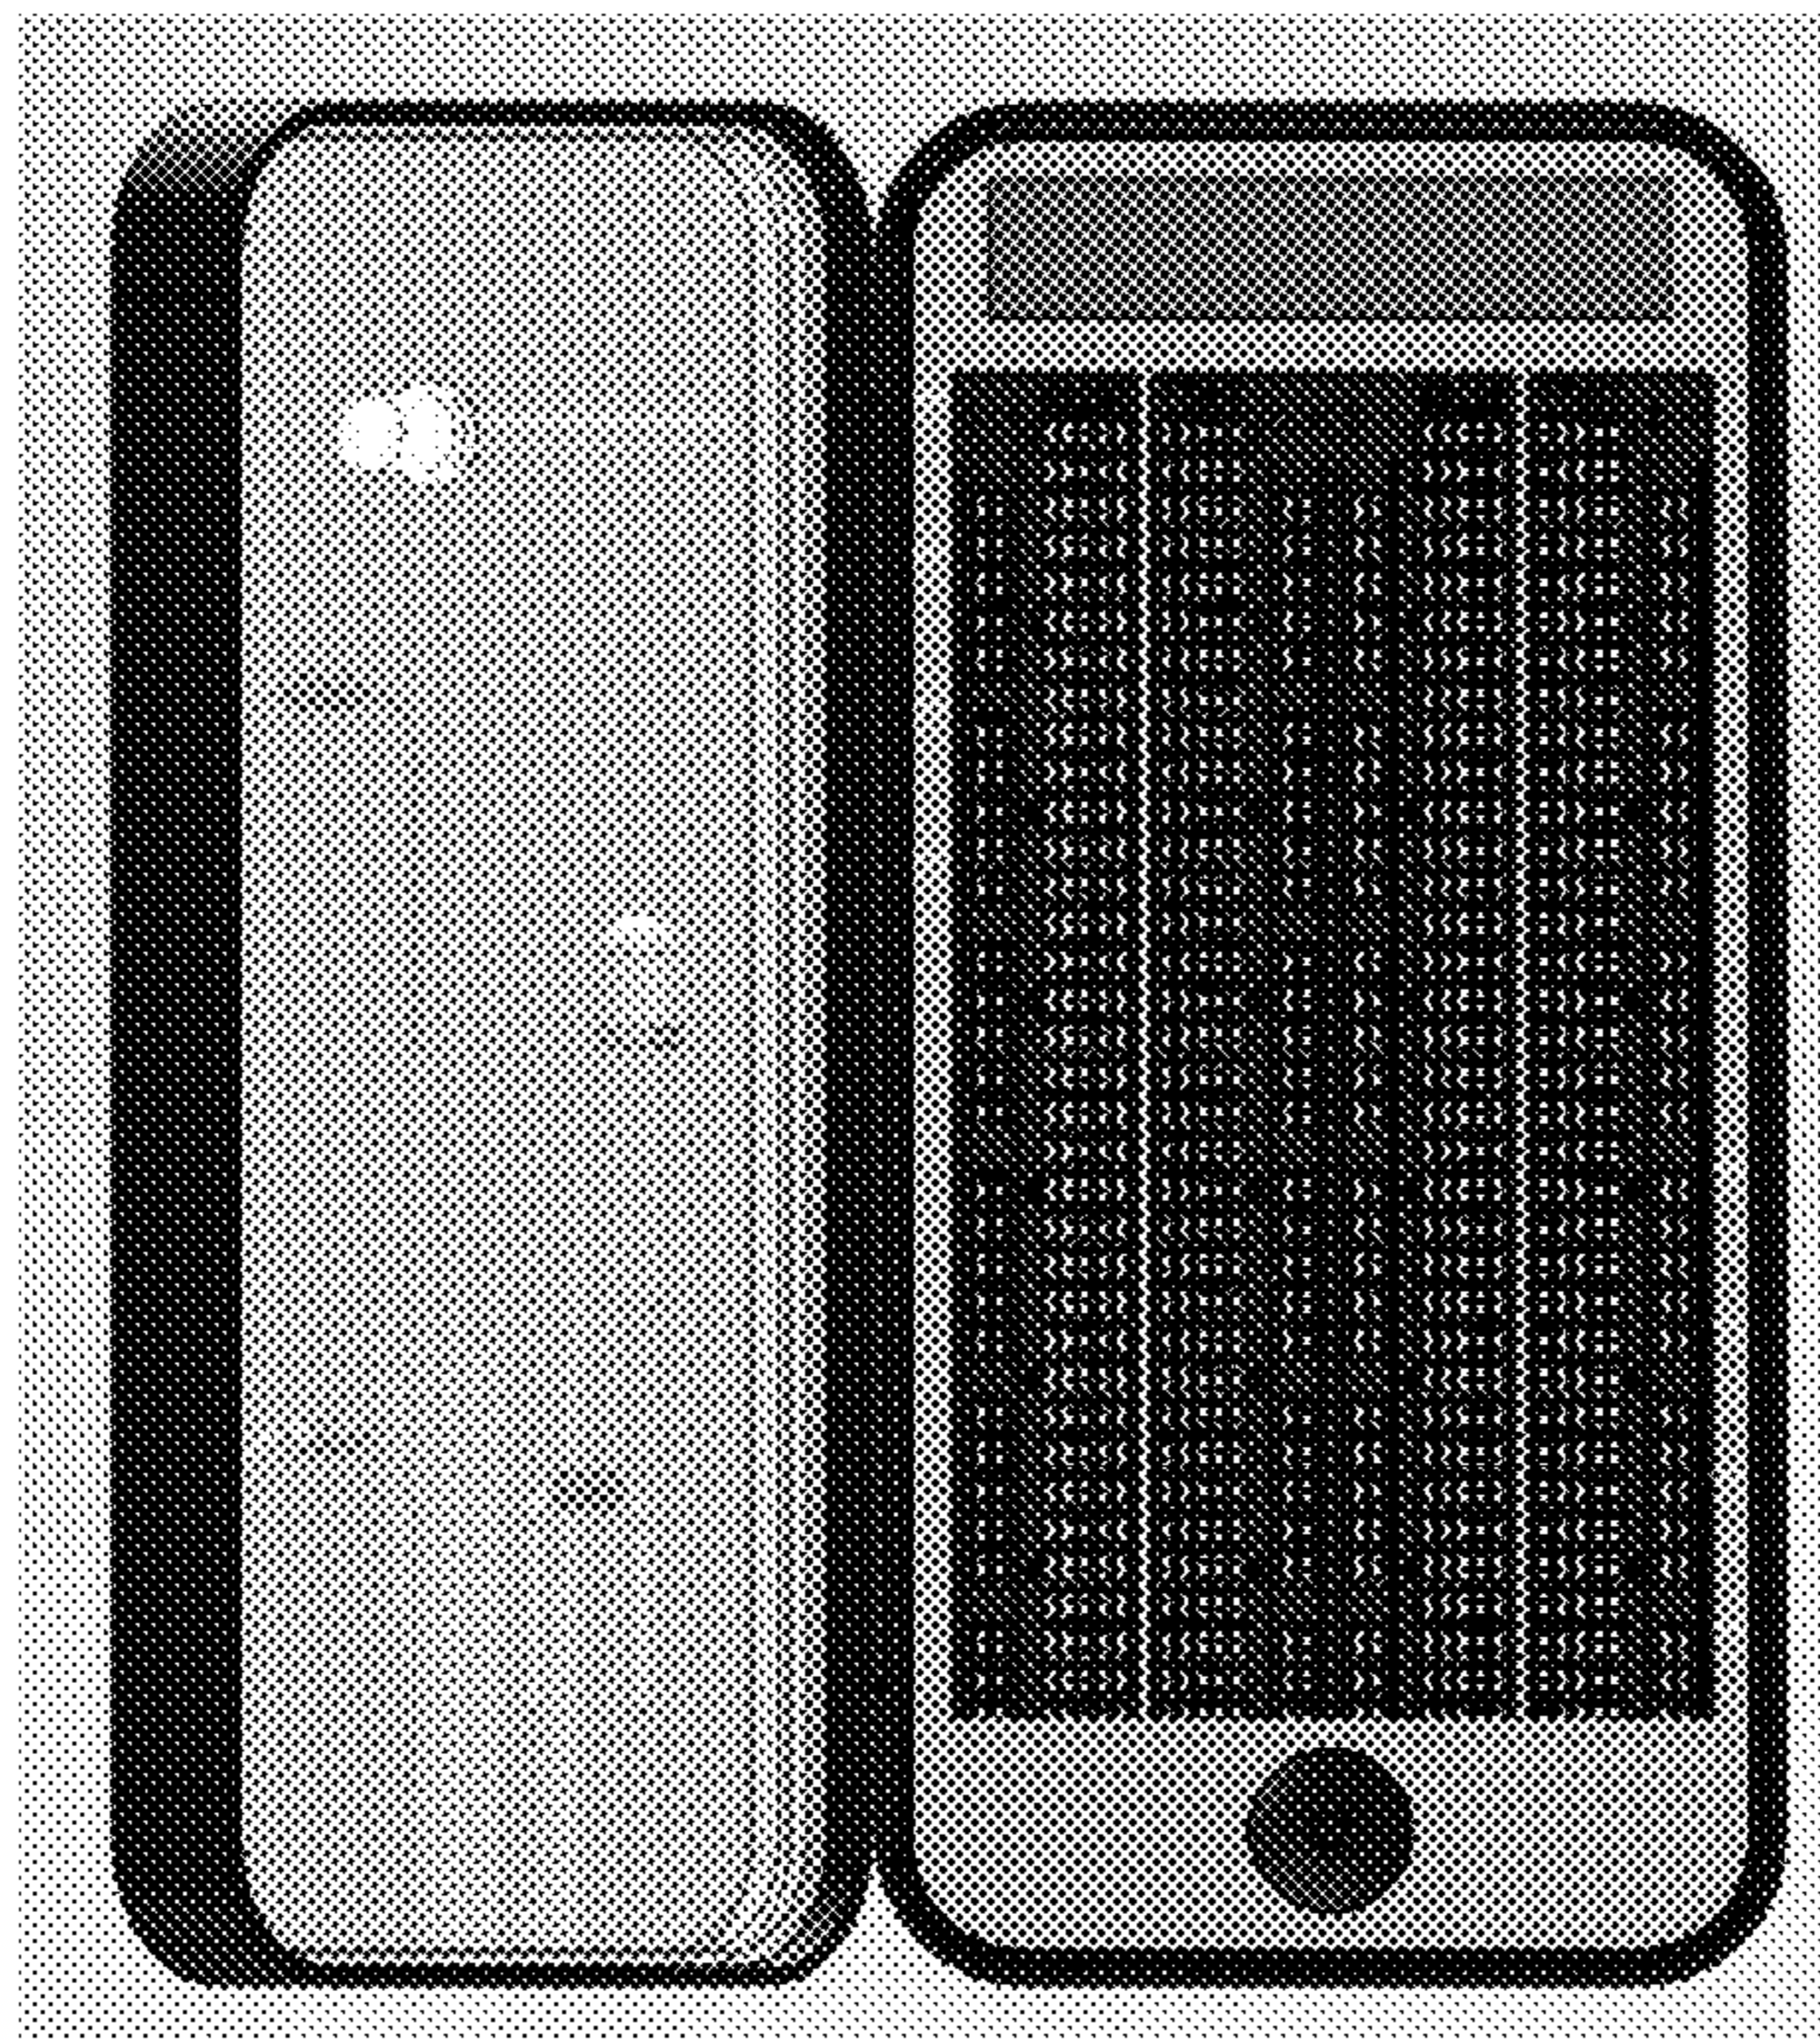

FIG. 4 is a right side elevational view of the wireless electronic prototyping system.

FIG. 5 is a top plan view of the wireless electronic prototyping system; and,

FIG. 6 is a bottom plan view of the wireless electronic prototyping system.

The novel design of the wireless electronic prototyping system as described herein allows wireless testing of different electronic circuitry, and is advantageously provided as portable kit that can be accessed via a cloud based application using a mobile communication device or any other communication device.
