(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image of a display screen with transitional graphical user interface;

FIG. 2 is a front view of a second image thereof;

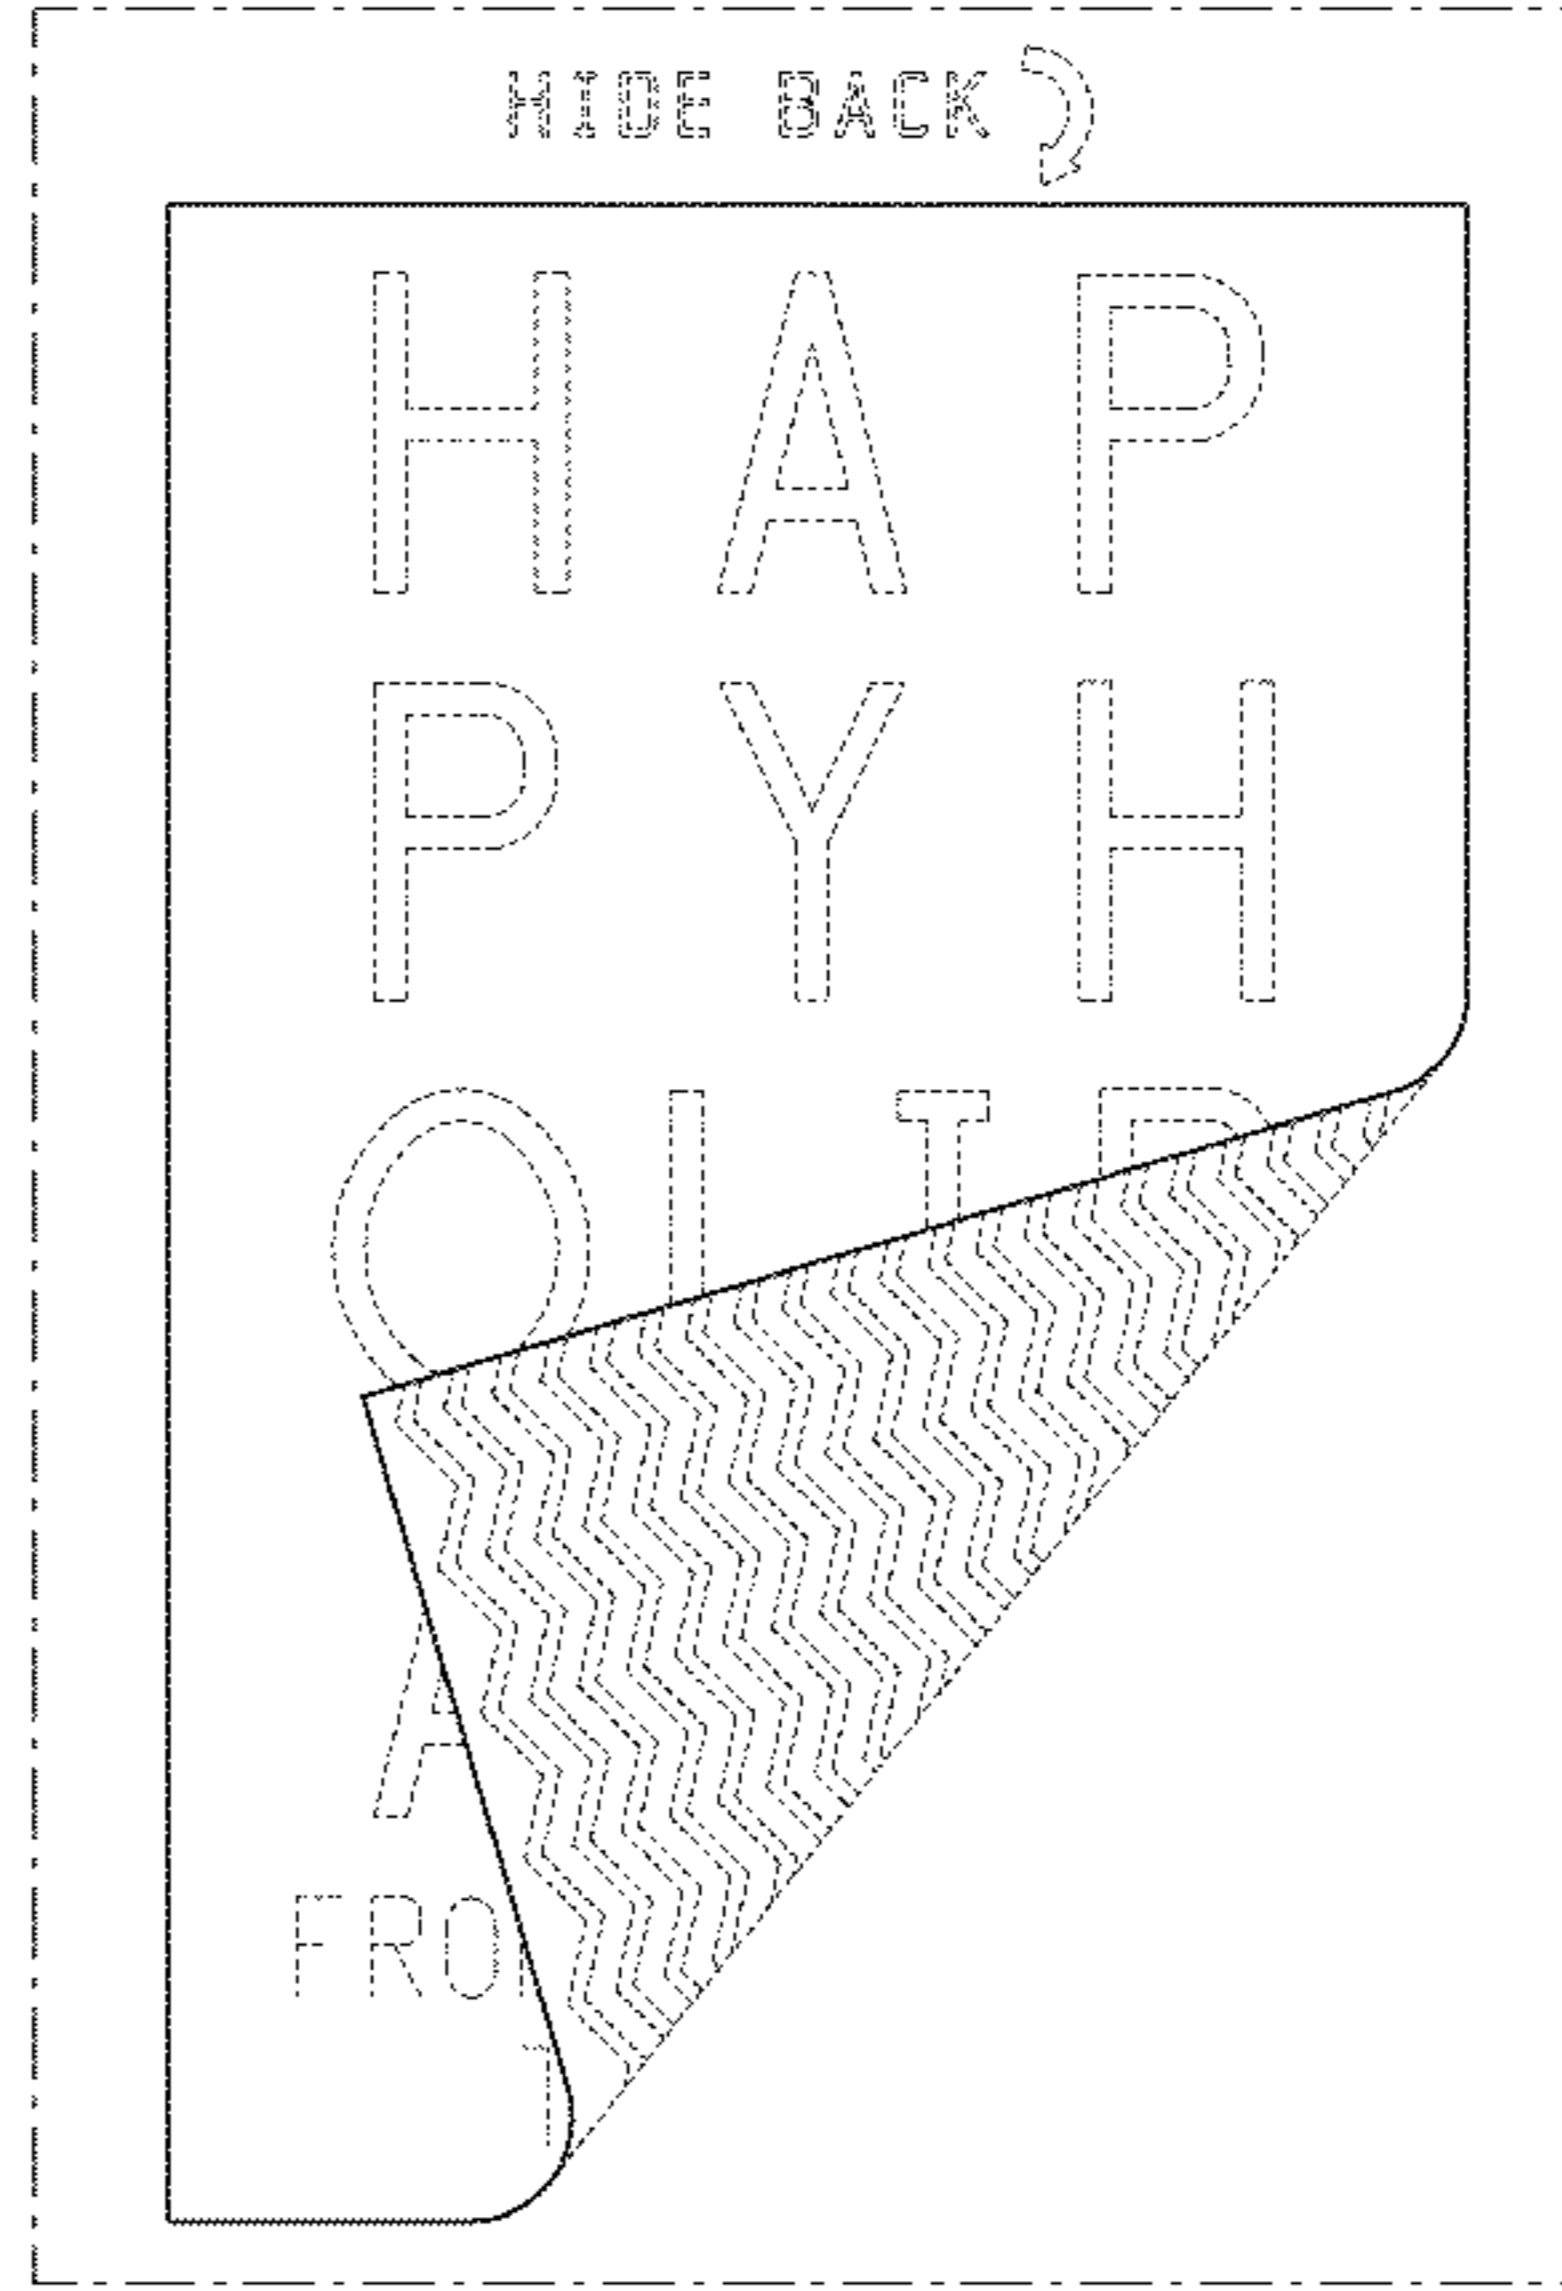

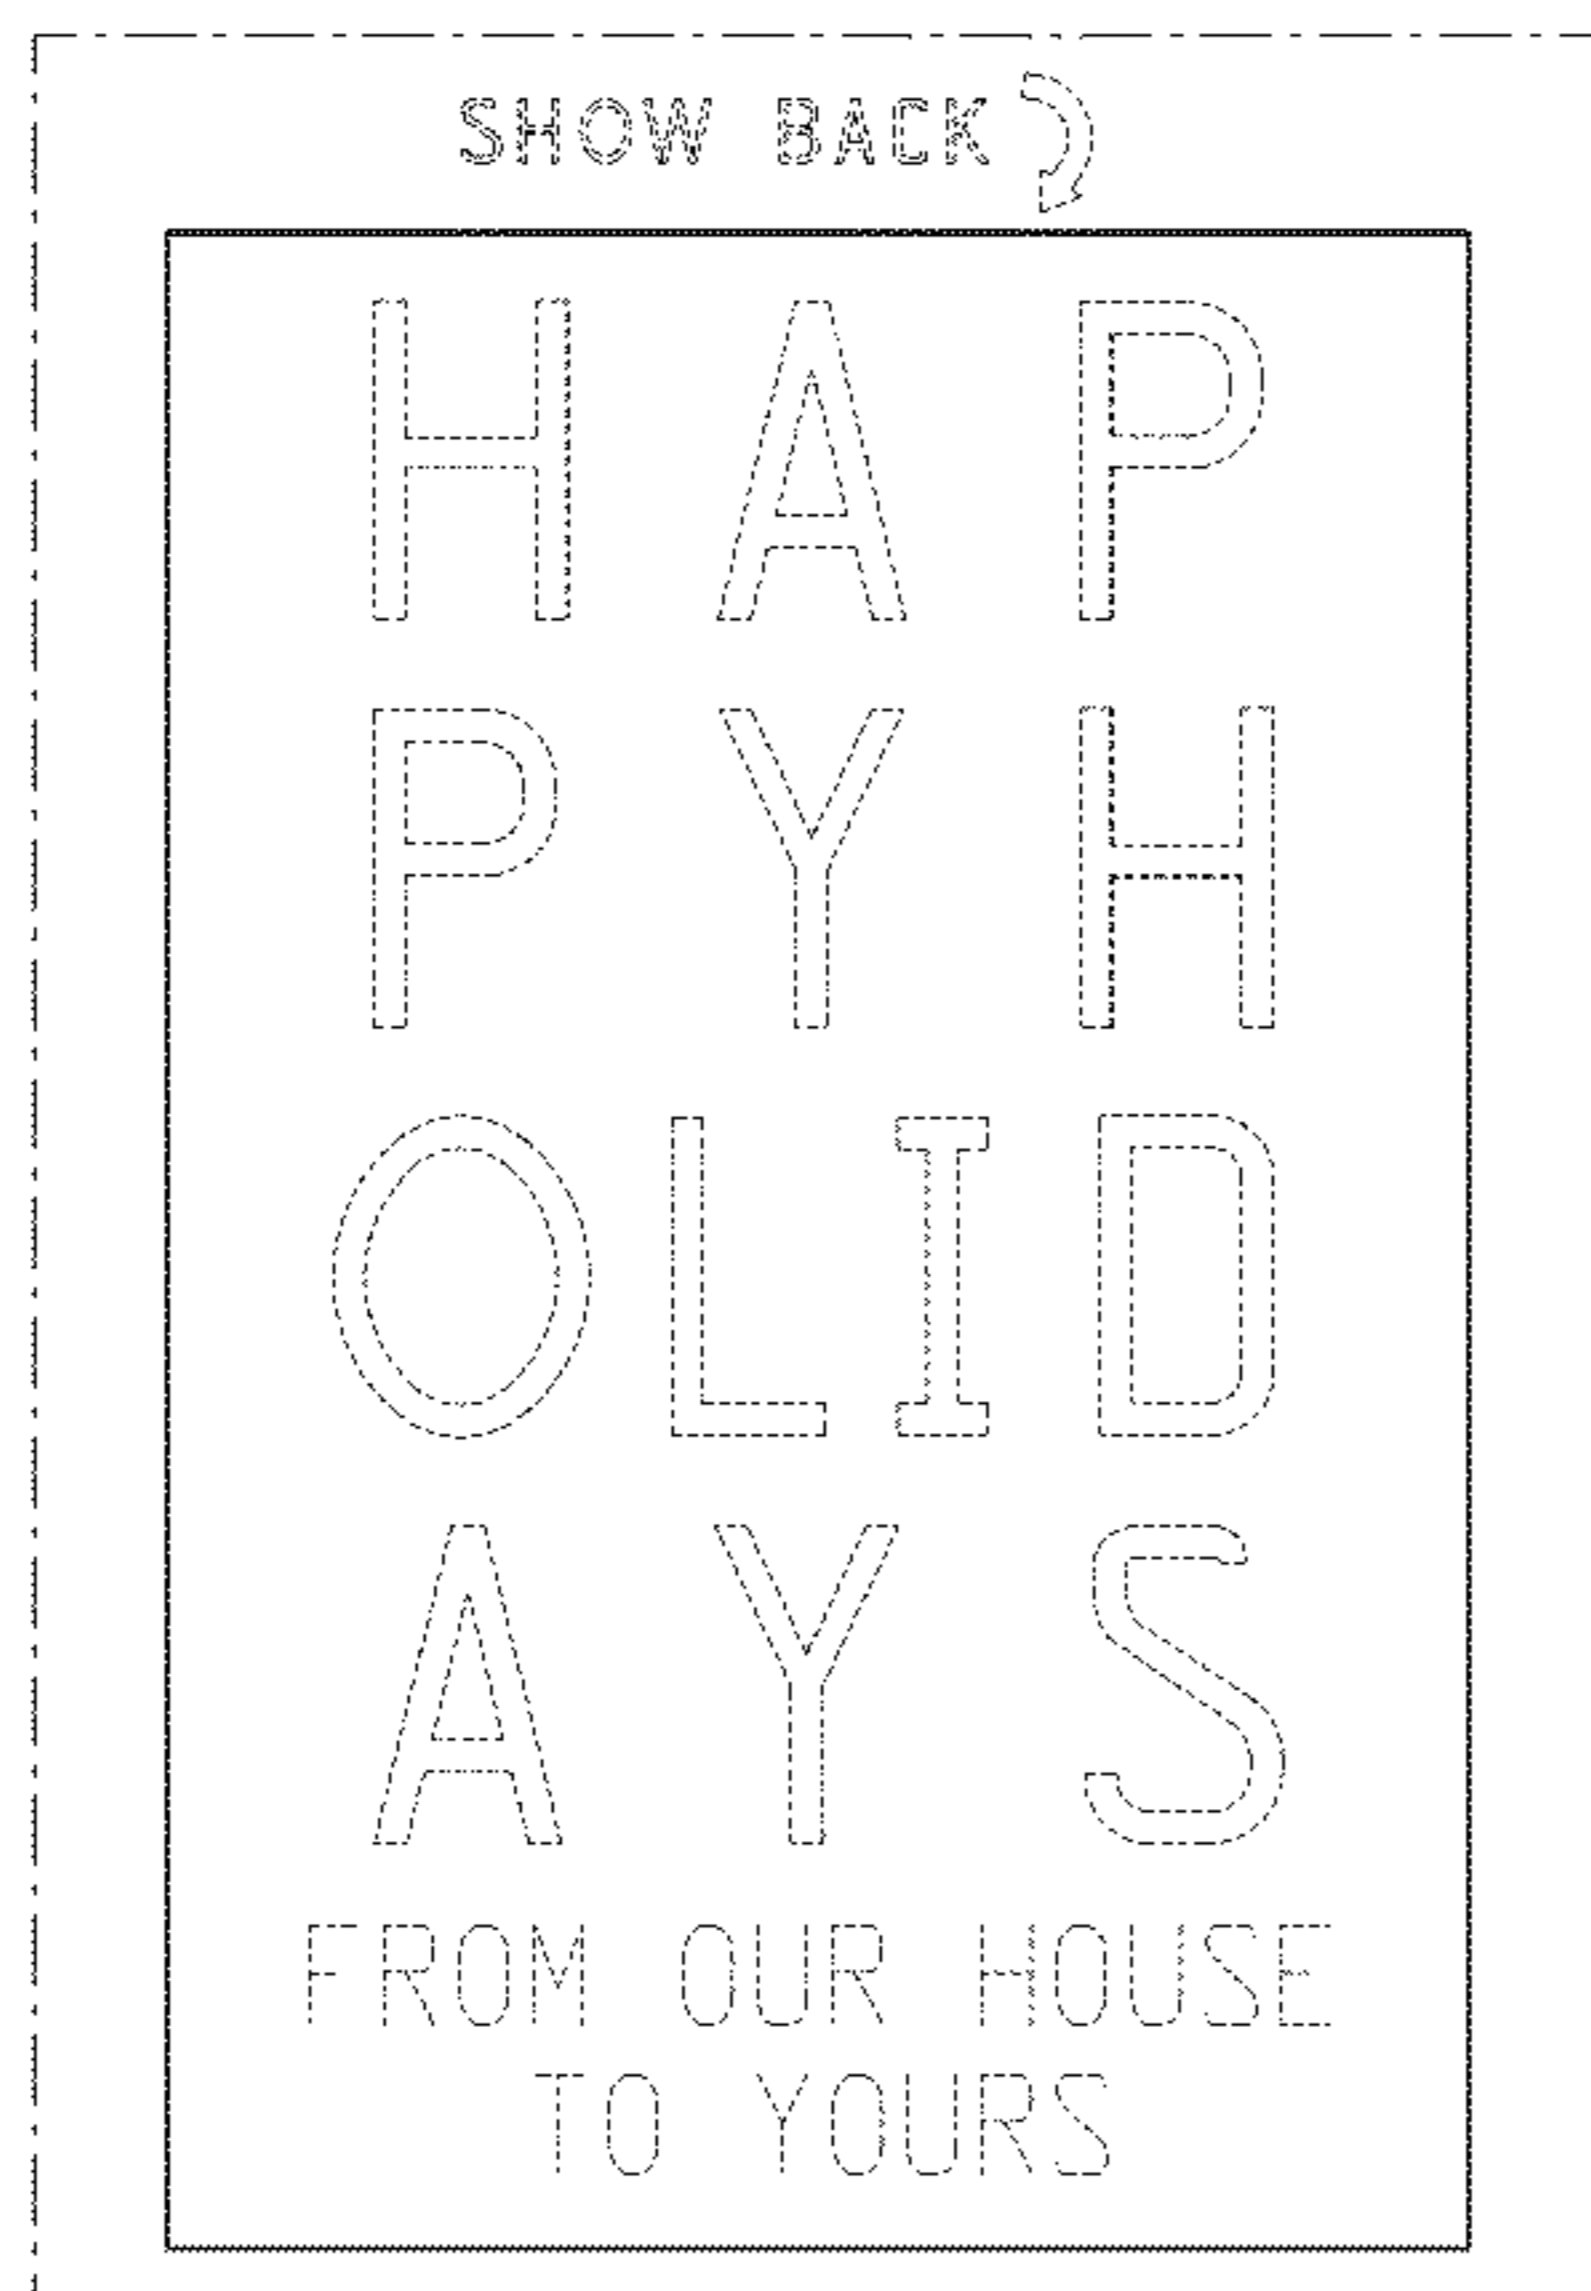

FIG. 3 is a front view of a first image of a display screen with transitional graphical user interface showing a second embodiment; and,

FIG. 4 is a front view of a second image thereof.

The rectangle shown with a dot-dash line represents a display screen that forms no part of the claimed design. The text, patterns and other images shown in broken lines form no part of the claimed design.

The first embodiment consists of a transition from FIG. 1 to FIG. 2 and back from FIG. 2 to FIG. 1. The second embodiment consists of a transition from FIG. 3 to FIG. 4 and back from FIG. 4 to FIG. 3. The subject matter in this patent includes a process or period in which an image changes into another image. The process or period forms no part of the claimed design.
