(57) **CLAIM**

The ornamental design for a display screen with multistate graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a first state of a display screen with multistate graphical user interface showing the new design.

FIG. 2 is a second state of a display screen with multistate graphical user interface showing the new design; and,

FIG. 3 is a first state of a display screen with multistate graphical user interface showing the new design.

The appearance of the display screen with multistate graphical user interface transitions between the images shown in FIGS. 1-3 responsive to user input selecting a corresponding menu item.

The process or period in which one image transitions to another forms no part of the claimed design. The broken line showing of the display screen is for environmental purposes only and forms no part of the claimed design. The broken line region depicting each icon and the area there within represents unclaimed portions of the design.
