(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a display screen with transitional graphical user interface, showing my new design; FIG. 2 is a front view of a display screen with transitional graphical user interface; FIG. 3 is a front view of a display screen with transitional graphical user interface; FIG. 4 is a front view of a display screen with transitional graphical user interface; and, FIG. 5 is a front view of the display screen with transitional graphical user interface of FIG. 1 in which a mobile terminal is provided in broken lines to illustrate an example environment.

The appearance of the transitional graphical user interface sequentially transitions between the graphical user interfaces shown in FIGS. 1 through 4. The subject matter of this patent includes a process or period in which a graphical user interface changes into another graphical user interface. This process or period forms no part of the claimed design. The broken line drawing of the mobile terminal, and the text, number, symbol and otherwise images shown in broken lines in the display screen with transitional graphical user interface of FIGS. 1 through 5 are for illustrative purposes only and form no part of the claimed design.
