FIG. 13 is a front view of a portion of a display panel with transitional graphical user interface showing a first image in a sequence according to a fifth embodiment of our new design; FIG. 14 is a front view of a second image in the sequence of the fifth embodiment; FIG. 15 is a front view of a third image in the sequence of the fifth embodiment; FIG. 16 is a front view of a portion of a display panel with transitional graphical user interface showing a first image in a sequence according to a sixth embodiment of our new design; FIG. 17 is a front view of a second image in the sequence of the sixth embodiment; and,

FIG. 18 is a front view of a third image in the sequence of the sixth embodiment.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The broken lines showing of a portion of a display panel, text and images illustrate environment and form no part of the claimed design.
