As shown in FIGS. 7-12, the surface of the cabinet door has a metal color finish, such as stainless steel for example, as represented by the gray or silver color shading. In FIGS. 7-12 the shading is not extended over the tread pattern for clarity, but it is understood that the entire cabinet door can have the metal color finish. The broken line showing of a cabinet housing in FIGS. 1-12 are included for illustrative purposes only and form no part of the claimed design.
