DESCRIPTION

(63) Continuation-in-part of application No. 29/395,617,
filed on Feb. 29, 2012, now Pat. No. Des. 686,751.

See application file for complete search history.

FIG. 1 is a front perspective view showing my new design,
with portions of a central region of the panel that form no part
of the claimed design shown by broken lines indicating that
the panel has an indefinite length;

FIG. 2 is a rear perspective view thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a top view thereof;

FIG. 5 is a bottom view thereof;

FIG. 6 is a right end view thereof, it being understood that a
left end view would be a mirror image of the right end view;
and,

FIG. 7 is a sectional view, on an enlarged scale, as seen from
a plane indicated by a line 7-7 in FIG. 3, showing a bracket
shaped like the numeral “7.”

The design relates to short opposite end regions and to a short
central region of a side panel that is used in forming a pipe
trench. The three short regions of the claimed design are
connected by intervening structure that forms no part of the
claimed design.

All subject matter depicted by broken lines is environmental,
is provided for merely for illustrative purposes, and forms no
part of the claimed design.
