A portion of the disclosure of this patent document contains
material which is subject to copyright protection. The copy-
right owner has no objection to facsimile reproduction by
anyone of the patent document or the patent disclosure, as it
appears in the Patent and Trademark Office patent file or
records, but otherwise reserves all other copyright rights
whatsoever. The following notice applies to the drawings that
form a part of this document: Copyright © 2012 Adobe Sys-
tems Inc. All rights reserved.

FIG. 1 is a face view of a portion of a display with a transi-
tional user interface showing my new design, according to a
first embodiment and illustrating a first image thereof.

FIG. 2 is a face view of the portion of the display with the
transitional user interface shown in FIG. 1, according to the
first embodiment and illustrating a second image thereof.

FIG. 3 is a face view of a portion of a display with the
transitional user interface, according to a second embodiment
and illustrating a first image thereof.

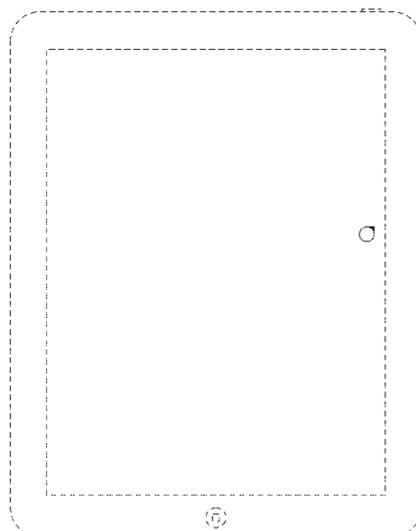

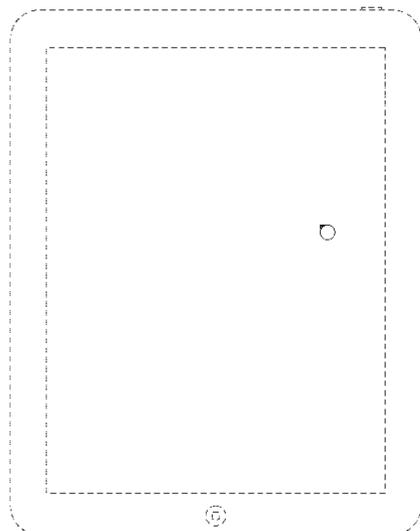

FIG. 4 is a face view of the portion of the display with the transitional user interface shown in FIG. 3, according to the second embodiment and illustrating a second image thereof.

FIG. 5 is a face view of a portion of a display with the transitional user interface, according to a third embodiment and illustrating a first image thereof.

FIG. 6 is a face view of the portion of the display with the transitional user interface shown in FIG. 5, according to the third embodiment and illustrating a second image thereof.

FIG. 7 is a face view of a portion of a display with the transitional user interface, according to a fourth embodiment and illustrating a first image thereof.

FIG. 8 is a face view of the portion of the display with the transitional user interface shown in FIG. 7, according to the fourth embodiment and illustrating a second image thereof.

FIG. 9 is an enlarged face view of the first image of the transitional user interface, according to the first and second embodiments, as respectively shown in FIG. 1 and FIG. 3.

FIG. 10 is an enlarged face view of the second image of the transitional user interface, according to the first and second embodiments, as respectively shown in FIG. 2 and FIG. 4.

FIG. 11 is an enlarged face view of the first image of the transitional user interface, according to the third and fourth embodiments, as respectively shown in FIG. 5 and FIG. 7; and,

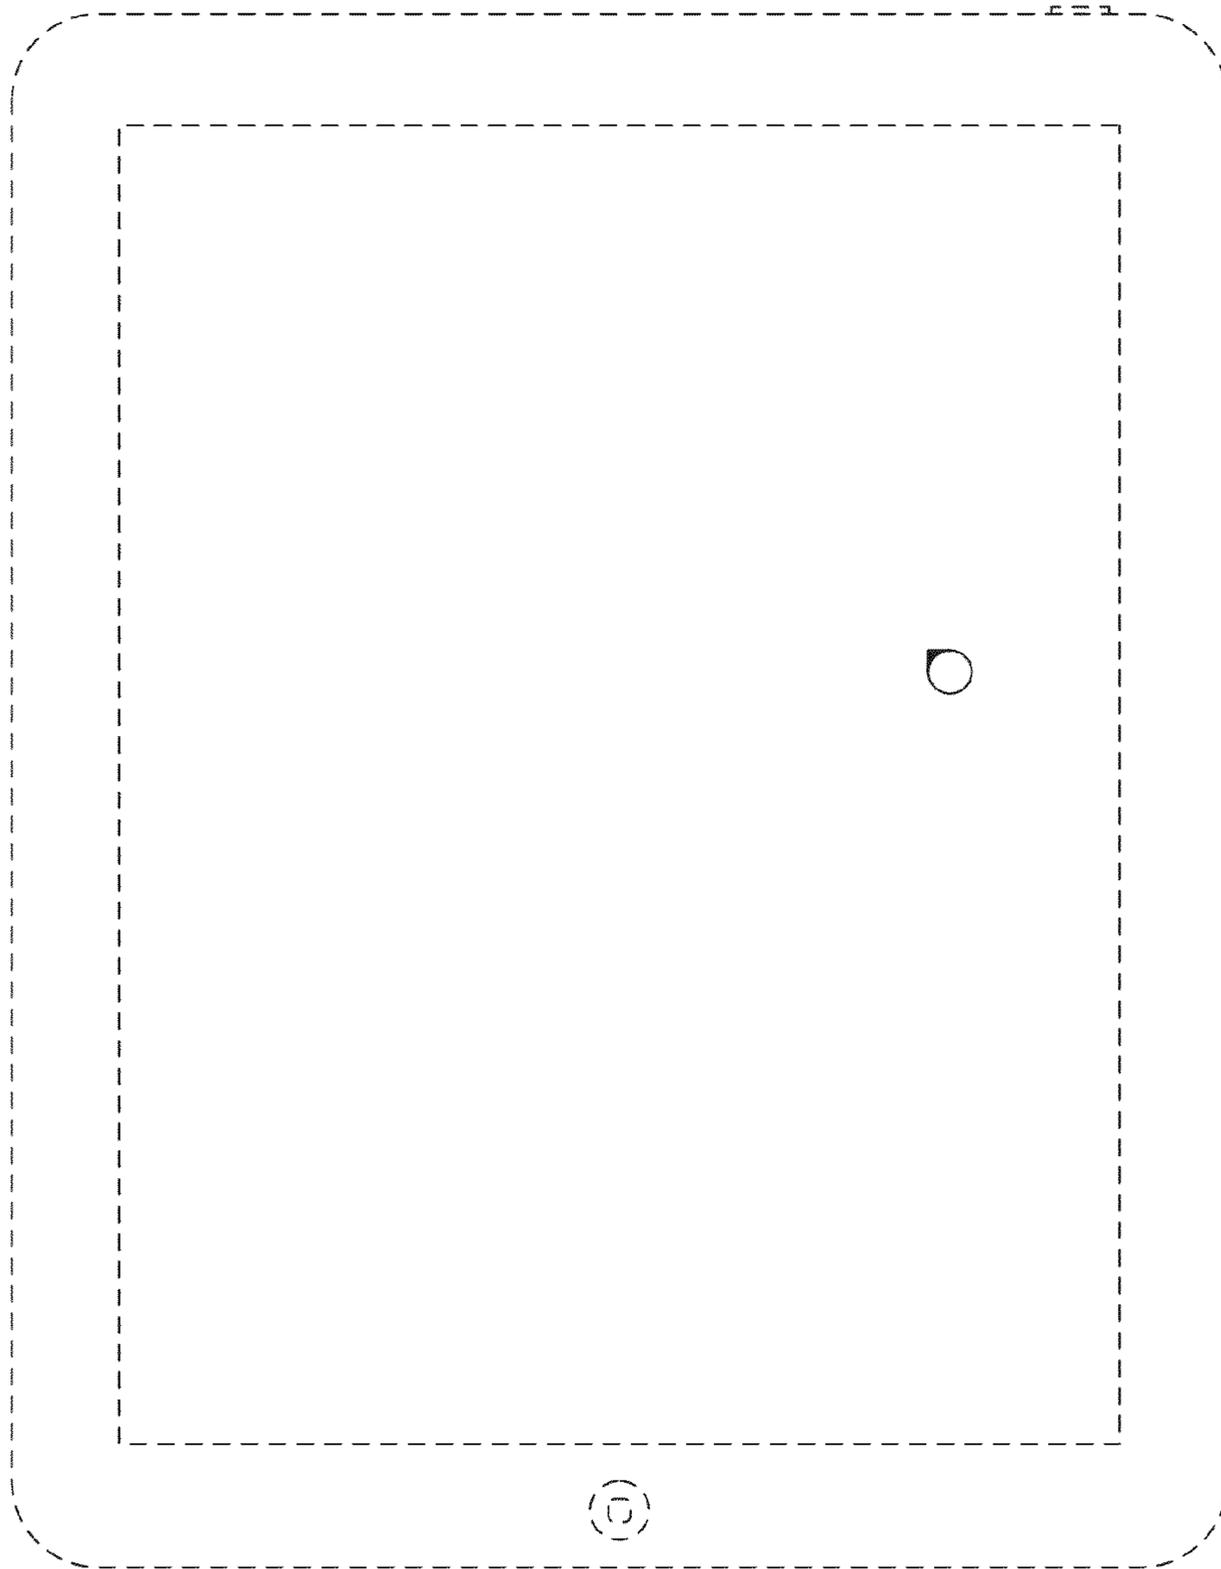

FIG. 12 is an enlarged face view of the second image of the transitional user interface, according to the third and fourth embodiments, as respectively shown in FIG. 6 and FIG. 8.

The appearance of the transitional user interface sequentially transitions between the images shown in FIGS. 1-2, between the images shown in FIGS. 3-4, between the images shown in FIGS. 5-6, or between the images shown in FIGS. 7-8. The process or period in which one image transitions to another image forms no part of the claimed design.

The enlarged appearance of the transitional user interface sequentially transitions between the images shown in FIGS. 9-10 or between the images shown in FIGS. 11-12. The process or period in which one image transitions to another image forms no part of the claimed design.

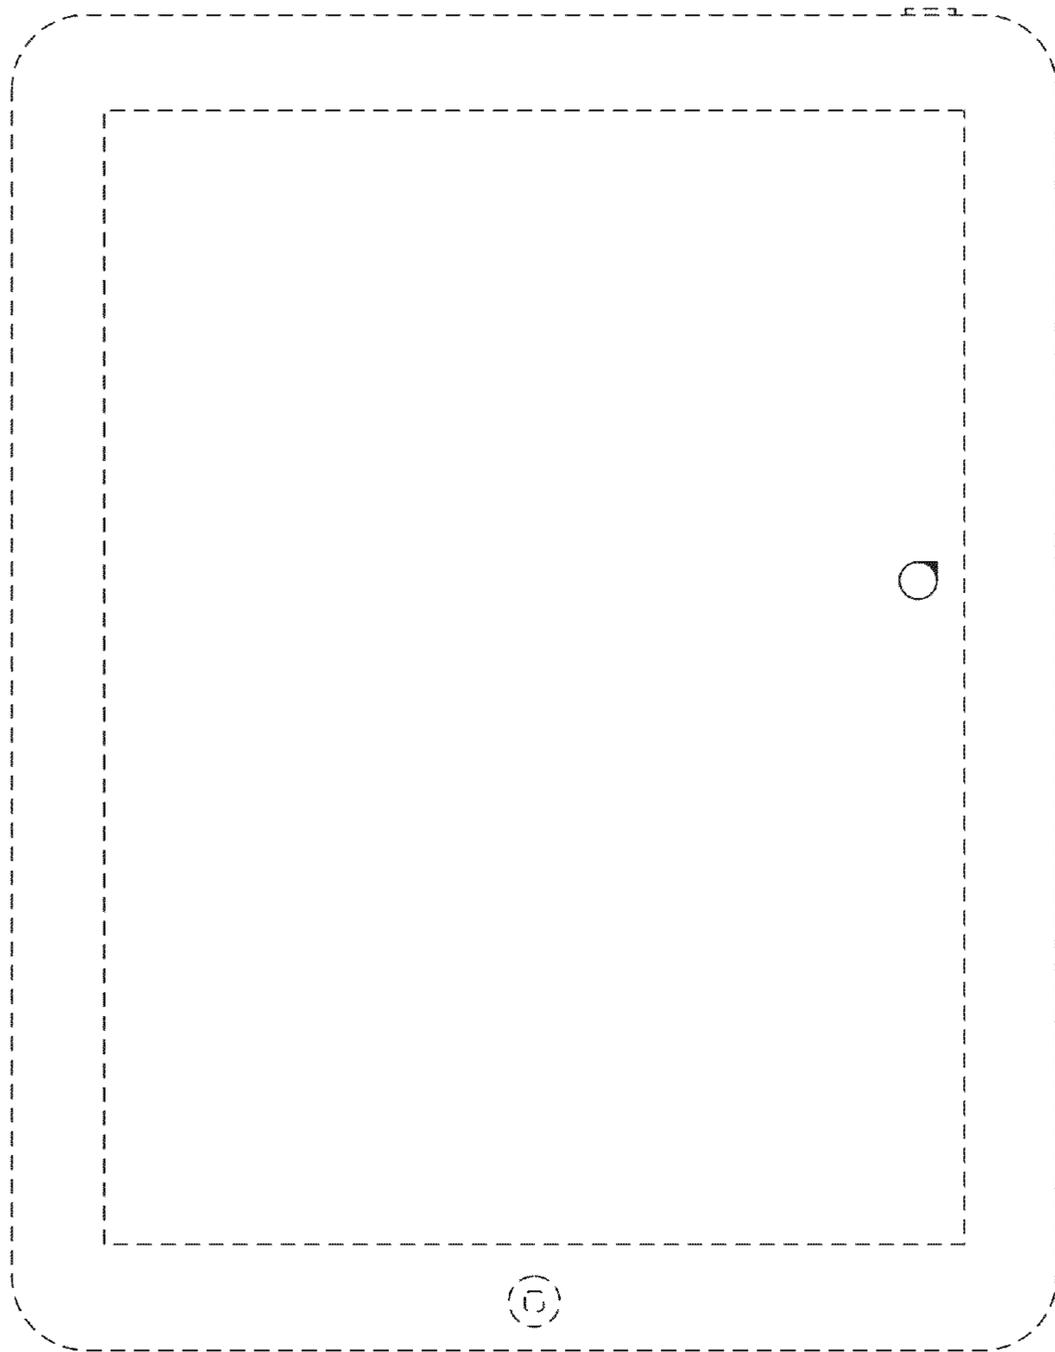

The portion of a display shown in broken lines forms no part of the claimed design.
