(57) **CLAIM**

The ornamental design for a medication adherence device based on digital visualization without moving parts, substantially as shown and described.

DESCRIPTION

FIG. 1 is a frontal/top perspective view of a medication adherence device based on digital visualization without moving parts according to our new design; FIG. 2 is a right side elevation view thereof, the opposite side being a mirror image; FIG. 3 is a top plan view thereof; FIG. 4 is a front elevation view thereof; and, FIG. 5 is a rear elevation view thereof, the bottom forming no part of our design.
