The ornamental design which is claimed is shown in solid lines in the drawings. The broken lines in the drawings are for

illustrative purposes only and form no part of the claimed design. Broken lines formed by equal length dashes show unclaimed portions of the design. Broken lines formed of unequal length dashes (i.e., dash-dot) show boundaries between claimed and unclaimed portions of the design. Lines having a jagged element are not part of the claimed design and show that no particular length of the portion is claimed.

Portions shown in stipple shading as opposed to line shading (e.g., as shown in FIG. 15) are intended to illustrate contrasting surfaces unlimited by colors, textures, or other decorative embellishments. According to such an example, the seat and back members may be made of a fabric and have an associated texture as such, in contrast

to that of the frame members supporting the seat and back members. According to other examples, the contrasting surfaces may have other appearances and/or textures.

While the accompanying drawings illustrate one or more exemplary embodiments, it should be understood that according to other exemplary embodiments that should be considered to be within the possession of the inventors of the present application at the time this application is being filed, it is contemplated that any illustrated solid lines (or portions thereof) may be converted to broken lines and that any illustrated broken lines (or portions thereof) may be converted to solid lines so as to claim or disclaim portions, components, or sub-components of the designs shown. It is further contemplated that shading may be added or removed to claim or disclaim the corresponding surfaces.
