(57) **CLAIM**

The ornamental design for a a slideable cover, which includes biometric verification means, for a tablet device, as shown and described.

DESCRIPTION

FIG. 1 is a front, right-side, and top perspective view of the invention with the slideable cover in the closed position. FIG. 2 is a front, right-side, and top perspective view of the invention with the slideable cover in the open position. FIG. 3 is a front, left-side, and bottom perspective view of the invention with the slideable cover in the closed position. FIG. 4 is a front, left-side, and bottom perspective view of the invention with the slideable cover in the open position. FIG. 5 is a rear, left-side, and bottom perspective view of the invention with the slideable cover in the closed position. FIG. 6 is a rear, left-side, and bottom perspective view of the invention with the slideable cover in the open position. FIG. 7 is a front elevation view of the invention with the slideable cover in the closed position. FIG. 8 is a front elevation view of the invention with the slideable cover in the open position. FIG. 9 is a rear elevation view of the invention with the slideable cover in the closed position. FIG. 10 is a rear elevation view of the invention with the slideable cover in the open position. FIG. 11 is a right side elevation view of the invention with the slideable cover in the closed position. FIG. 12 is a right side elevation view of the invention with the slideable cover in the open position. FIG. 13 is a left side elevation view of the invention with the slideable cover in the closed position. FIG. 14 is a left side elevation view of the invention with the slideable cover in the open position. FIG. 15 is a top plan view of the invention; and, FIG. 16 is a bottom plan view of the invention. The broken lines throughout the drawings showing a tablet device indicate the environment of the claim, forming no part of the claimed design.

1 Claim, 6 Drawing Sheets
