(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a face view of a first image of a display screen with transitional graphical user interface, showing my new design; and,

FIG. 2 is a face view of a second image thereof.

The features of the graphical user interface illustrated in a regularly broken line style, the display screen illustrated in an irregularly broken line style, and the text illustrated in a broken line style shown in FIGS. 1 and 2 form no part of the claimed design.

The appearance of the transitional user interface sequentially transitions between the images shown in FIGS. 1 and 2, where a box in a first portion of the display illustrated in FIG. 1 appears as a smaller box within another box in a second portion of the display illustrated in FIG. 2. The process or period in which one image transitions to another image forms no part of the claimed design.

1 Claim, 2 Drawing Sheets
