(57) **CLAIM**

The ornamental design for a decoy wing, as shown and described.

DESCRIPTION

FIG. **1** is a top, right, rear perspective view of a decoy wing embodying our new design;
FIG. **2** is a top plan view thereof;
FIG. **3** is a front elevational view thereof;
FIG. **4** is a rear elevational view thereof;
FIG. **5** is a right side elevational view thereof;
FIG. **6** is a left side elevational view thereof;
FIG. **7** is a top, right, rear perspective view of a decoy wing according to another embodiment of our new design;
FIG. **8** is a top plan view thereof, the bottom plan view thereof being a mirror image of the top view shown;
FIG. **9** is a front elevational view thereof;
FIG. **10** is a rear elevational view thereof;
FIG. **11** is a right side elevational view thereof;
FIG. **12** is a left side elevational view thereof;
FIG. **13** is a top, right, rear perspective view of a decoy wing according to another embodiment of our new design;
FIG. **14** is a top, right, front perspective view thereof;
FIG. **15** is a top plan view thereof;
FIG. **16** is a bottom plan view thereof;
FIG. **17** is a front elevational view thereof;
FIG. **18** is a rear elevational view thereof;
FIG. **19** is a right side elevational view thereof;
FIG. **20** is a left side elevational view thereof;
FIG. **21** is a top, right, rear perspective view of a decoy wing according to another embodiment of our new design;
FIG. **22** is a top plan view thereof;
FIG. **23** is a front elevational view thereof;
FIG. **24** is a rear elevational view thereof;
FIG. **25** is a right side elevational view thereof;
FIG. **26** is a left side elevational view thereof;
FIG. **27** is a top, right, rear perspective view of a decoy wing according to another embodiment of our new design;
FIG. **28** is a top plan view thereof, the bottom plan view thereof being a mirror image of the top view shown;
FIG. **29** is a front elevational view thereof;
FIG. **30** is a rear elevational view thereof;
FIG. **31** is a right side elevational view thereof;

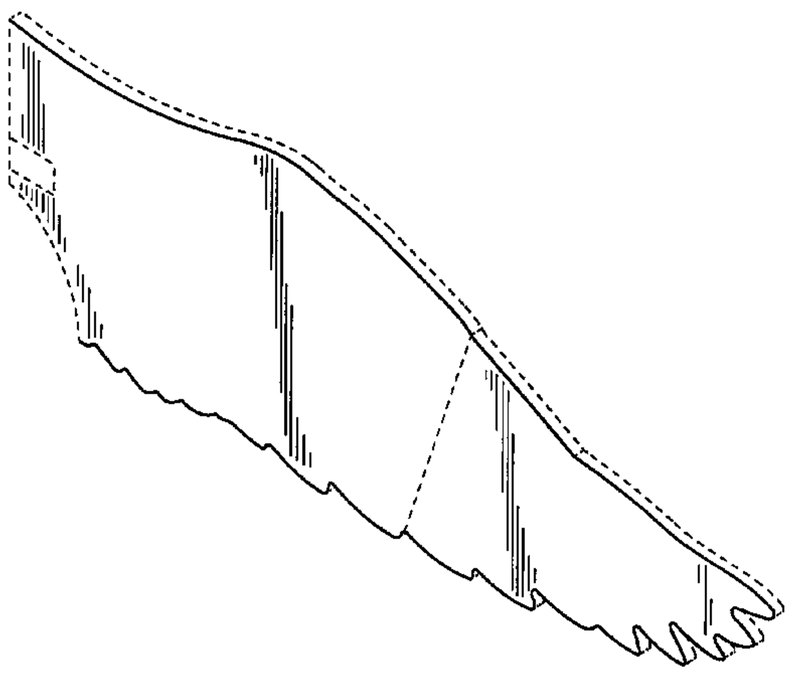

FIG. **32** is a left side elevational view thereof;
FIG. **33** is a top, right, rear perspective view of a decoy wing according to another embodiment of our new design;
FIG. **34** is a top, right, front perspective view thereof;
FIG. **35** is a top plan view thereof;
FIG. **36** is a bottom plan view thereof;
FIG. **37** is a front elevational view thereof;
FIG. **38** is a rear elevational view thereof;
FIG. **39** is a right side elevational view thereof;
FIG. **40** is a left side elevational view thereof;
FIG. **41** is a top, left, front perspective view of a decoy wing according to the FIG. **1** embodiment as shown with waterfowl decoy environment, the various views thereof being mirror images of FIGS. **2-6**; and,
FIG. **42** is a top, left, rear perspective view thereof.

Each embodiment of the claimed design can be a mirror image of that described above, in which the various views thereof are mirror images of the corresponding figures shown and described.

The broken line representations in the figures show unclaimed environment or boundaries, and thus form no part of the claimed design. The stippling shown in FIGS. **13**, **15**, **33** and **35** is used to represent a surface treatment that is different in texture or color, without reference to any specific texture or color, than the other surfaces or environment shown. For example, the stippling can represent a color that it is darker in color and contrast than that of the other surfaces or environment.
