(57) **CLAIM**

We claim the ornamental design for a display screen with animated-graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first image in a sequence for a display screen with an animated graphical user interface showing our new design;

FIG. 2 is a front view of the second image thereof, shown enlarged and separately for clarity of illustration;

FIG. 3 is a front view of the third image thereof, shown enlarged and separately for clarity of illustration;

FIG. 4 is a front view of the fourth image thereof, shown enlarged and separately for clarity of illustration;

FIG. 5 is a front view of the fifth image thereof, shown enlarged and separately for clarity of illustration;

FIG. 6 is a front view of the sixth image thereof, shown enlarged and separately for clarity of illustration;

FIG. 7 is a front view of the seventh image thereof, shown enlarged and separately for clarity of illustration; and,

FIG. 8 is a front view of the eighth image thereof, shown enlarged and separately for clarity of illustration.

The claimed design is an integral and active component in the operation of a computer-programmed device displaying the design. The appearance of the animated image sequentially transitions between the images shown in FIGS. 1-8.

The broken line showing of the display screen and the broken line showing of the portions of the user interface are included for the purpose of illustrating unclaimed environment and form no part of the claimed design.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.
