(57) **CLAIM**

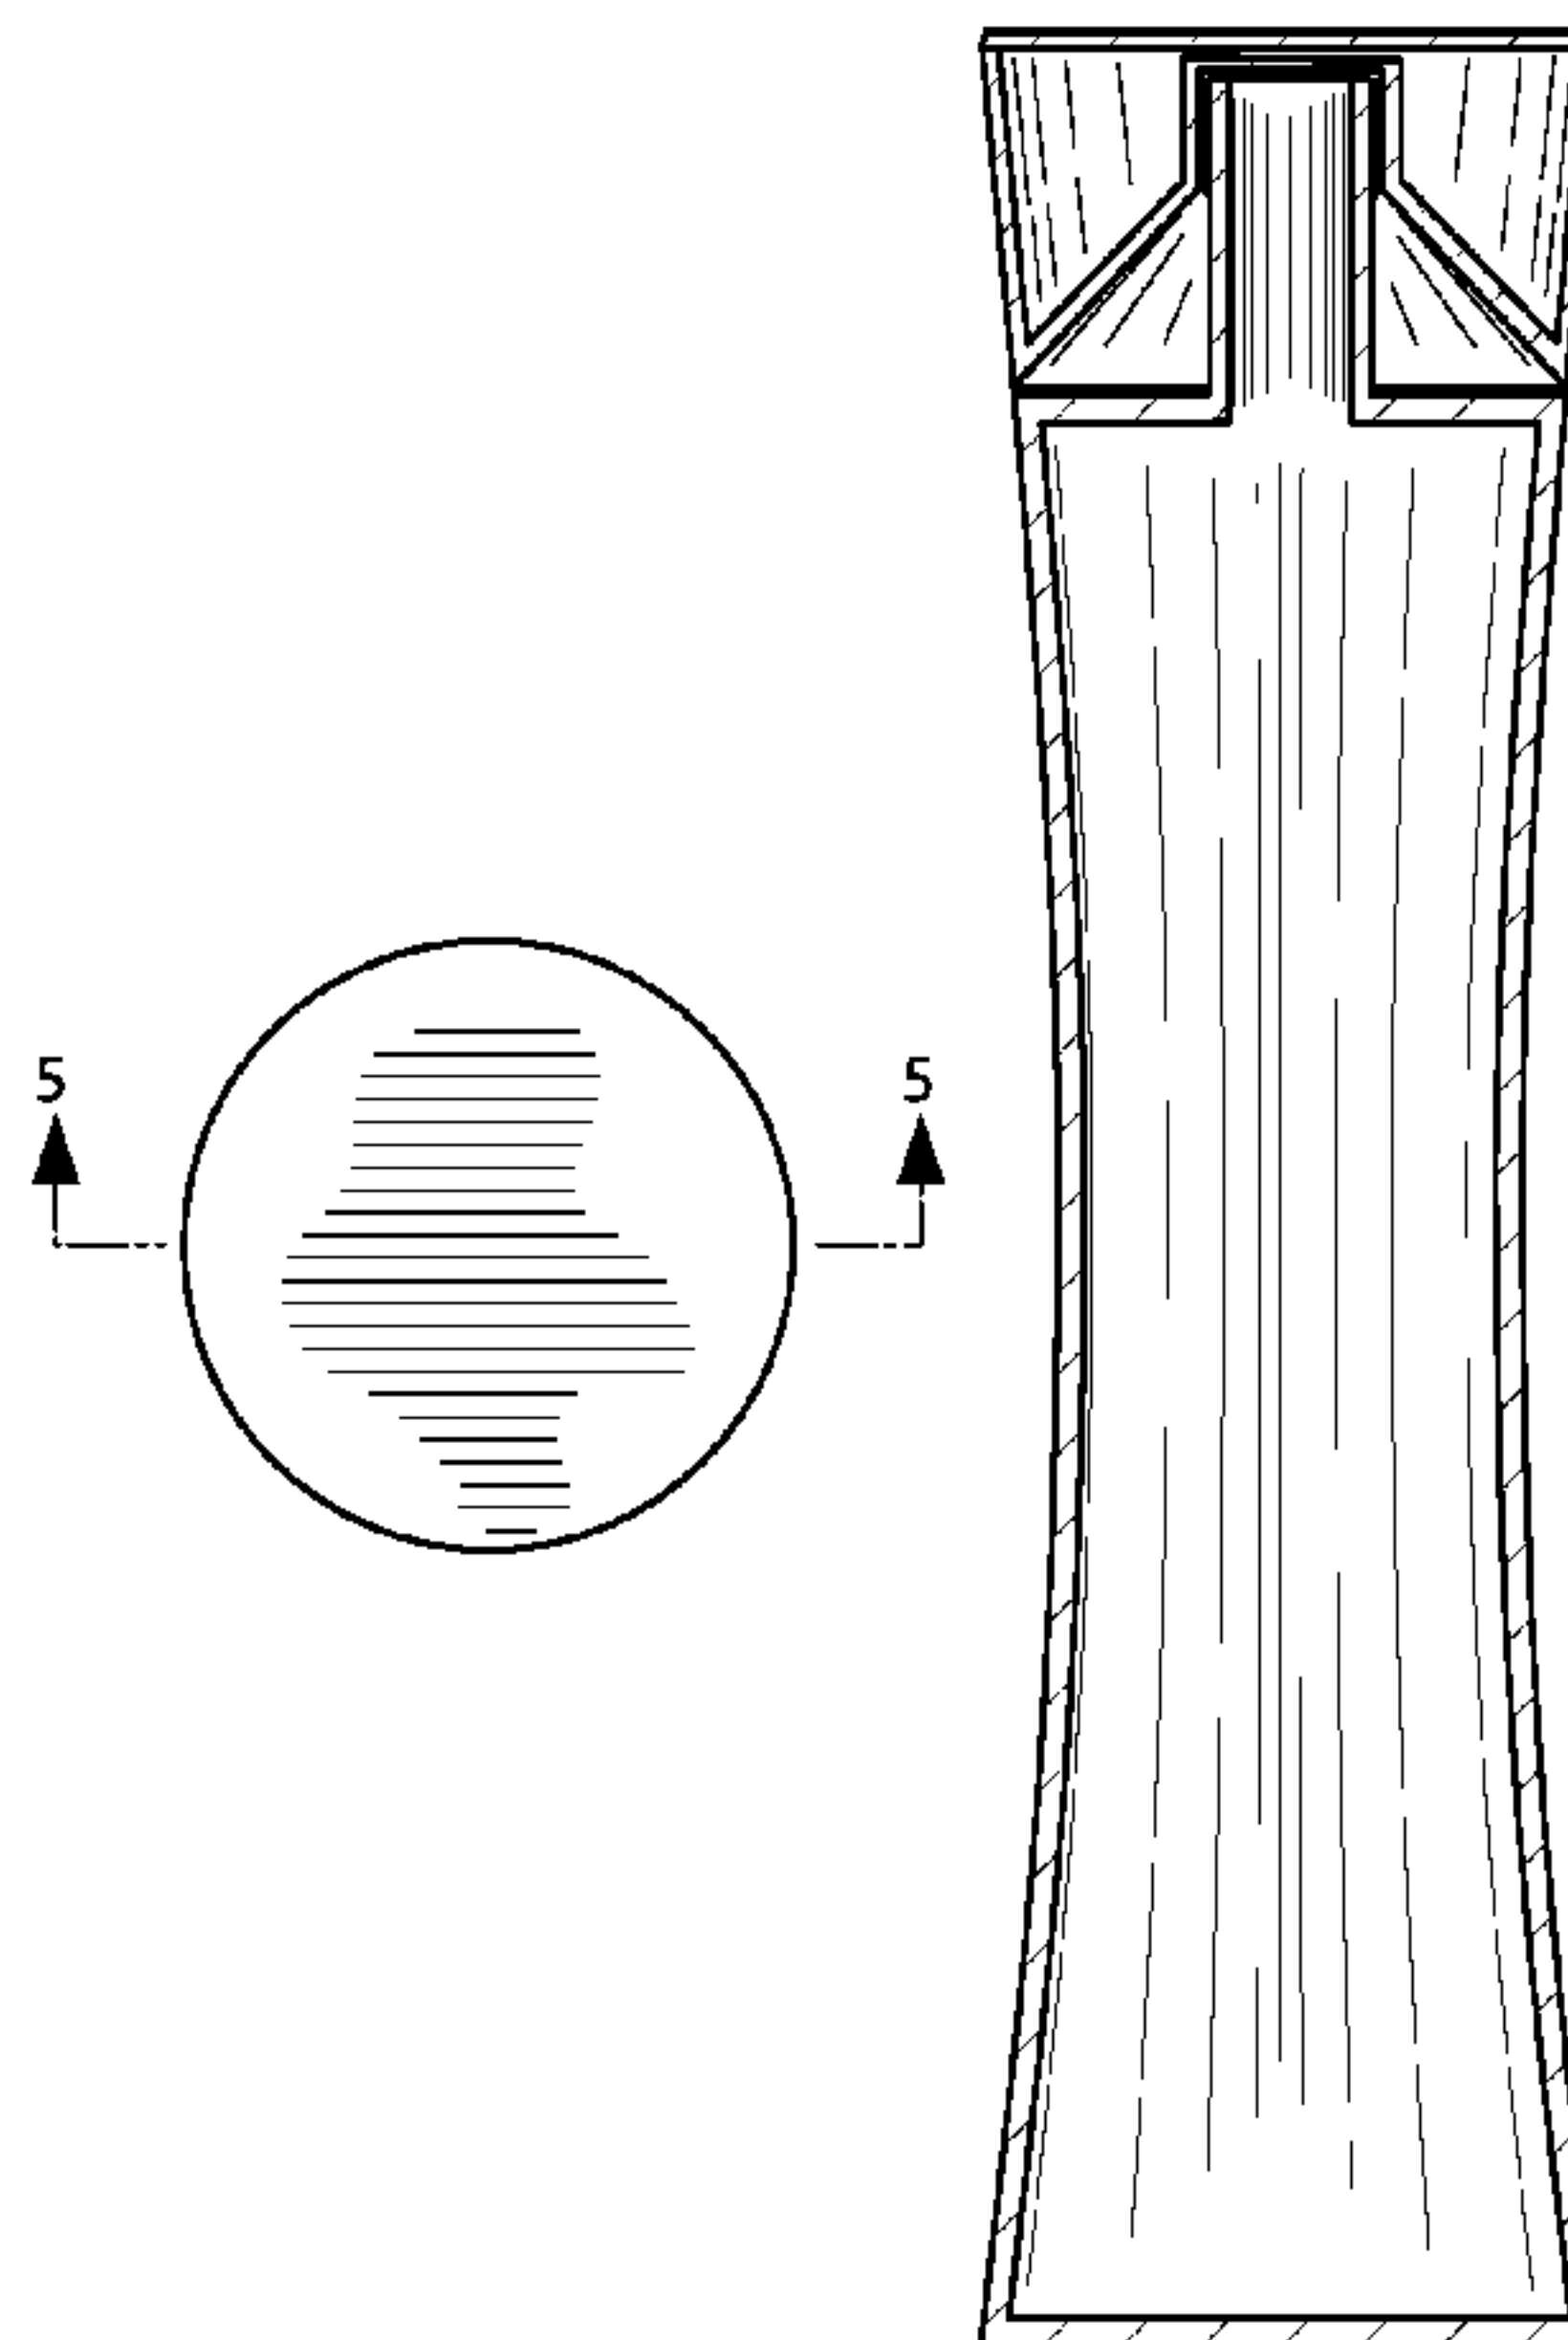

I claim the ornamental design for a bottle combined with cap having internal martini glass, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a bottle combined with cap having internal martini glass, showing my new design; FIG. 2 is an exploded perspective view thereof; FIG. 3 is a front elevational view thereof, the rear elevational view, left-side elevational view, and right-side elevational view all being a mirror image thereof; FIG. 4 is a top plan view thereof, the bottom plan view being a mirror image thereof; and, FIG. 5 is a cross-sectional view thereof, taken along lines 5-5 of FIG. 4.

It is understood that apart from the threads of the cap and the bottle, the design is radially symetric such that cross-sectional views across any diameter are, apart from the threads, identical.
