(57) **CLAIM**

The ornamental design for a temperature trend indicator for use with a surgical and post surgical patient insulation cap, as shown and described.

DESCRIPTION

FIG. 1 is an exploded perspective view of a temperature trend indicator for use with a surgical and post surgical patient insulation cap showing our new design;

FIG. 2 is a left side elevational view, the opposite side being a mirror image thereof;

FIG. 3 is a front elevational view thereof;

FIG. 4 is a rear elevational view thereof;

FIG. 5 is a reverse perspective view showing the underside;

FIG. 6 is a front perspective view showing in use thereof; and,

FIG. 7 is a front perspective view of the temperature trend indicator itself shown removed from the surgical and post surgical patient insulation cap.

The dashed lines in FIGS. 1-5 represent the surgical and post surgical patient insulation cap for use with the present invention, and forms no part of the current design. Further, the dashed lines in FIG. 6 represents the surgical and post surgical patient insulation cap for use with the present invention and a user's head, each of which form no part of the current design.
