(57) **CLAIM**

The ornamental design for a wristband health tracker module, as shown and described.

DESCRIPTION

FIG. 1A is a three-dimensional view of a wristband health tracker module that is insertable into a wristband case.

FIG. 1B is a three-dimensional back view of the wristband health tracker module of FIG. 1A.

FIG. 1C is a front view of the wristband health tracker module of FIG. 1A.

FIG. 1D is a side view of the wristband health tracker module of FIG. 1A.

FIG. 1E is a back view of the wristband health tracker module of FIG. 1A.

FIG. 1F is an opposing side view of the wristband health tracker module of FIG. 1A.

FIG. 1G is a top view of the wristband health tracker module of FIG. 1A; and,

FIG. 1H is a bottom view of the wristband health tracker module of FIG. 1A.

Dashed and dotted lines are used for illustrative purposes only to give environmental context to the claimed design and do not form any part of the claimed design.

Diagonal line hatching is used to indicate a transparent, translucent, or semi-translucent area of the wristband health tracker module. A display may be visible through the transparent, translucent, or semi-translucent area.

Stipple shading is used in FIGS. 1A through 1H; the stipple shading is not to be understood as conveying a particular surface finish. The surface finish may be smooth/gloss, satin, or textured. The depicted articles may be made using materials of various colors, including black, charcoal, white, dark blue, red, green, and other colors.

The wristband health tracker module depicted in FIGS. 1A through 1H may be inserted into a cavity near the middle of a wristband case, as shown in FIG. 2, and worn on a person's wrist as a wristband health tracker. The wristband health tracker module may also be referred to simply as a wristband health tracker (even without the wristband case).
