(57) **CLAIM**

The ornamental design for a magnifying container, as shown and described.

DESCRIPTION

FIG. 1 is a bottom perspective view of an ornamental design for a magnifying container comprising a magnifying lens and a truncated cone shaped member, where the magnifying lens is threadably engaged to a bottom inner periphery of the truncated cone shaped member;

FIG. 2 is a partial exploded view thereof, showing a threaded section at the bottom inner periphery of the truncated cone shaped member configured to threadably engage the magnifying lens;

FIG. 3 is a top perspective view thereof;

FIG. 4 is a front elevation view thereof;

FIG. 5 is a sectional view of the magnifying container taken along a section A-A in FIG. 4;

FIG. 6 is a top plan view thereof, showing a handle member of the magnifying container in a lowered position;

FIG. 7 is a bottom view thereof, showing the handle member of the magnifying container in a lowered position; and,

FIG. 8 is a top plan view thereof, showing the magnifying container being used to magnify aquatic elements such as starfish, shells, etc.

The broken line showing of the starfish, shells, etc., in FIG. 8 is for the purpose of illustrating environment and forms no part of the claimed design.
