(57) **CLAIM**

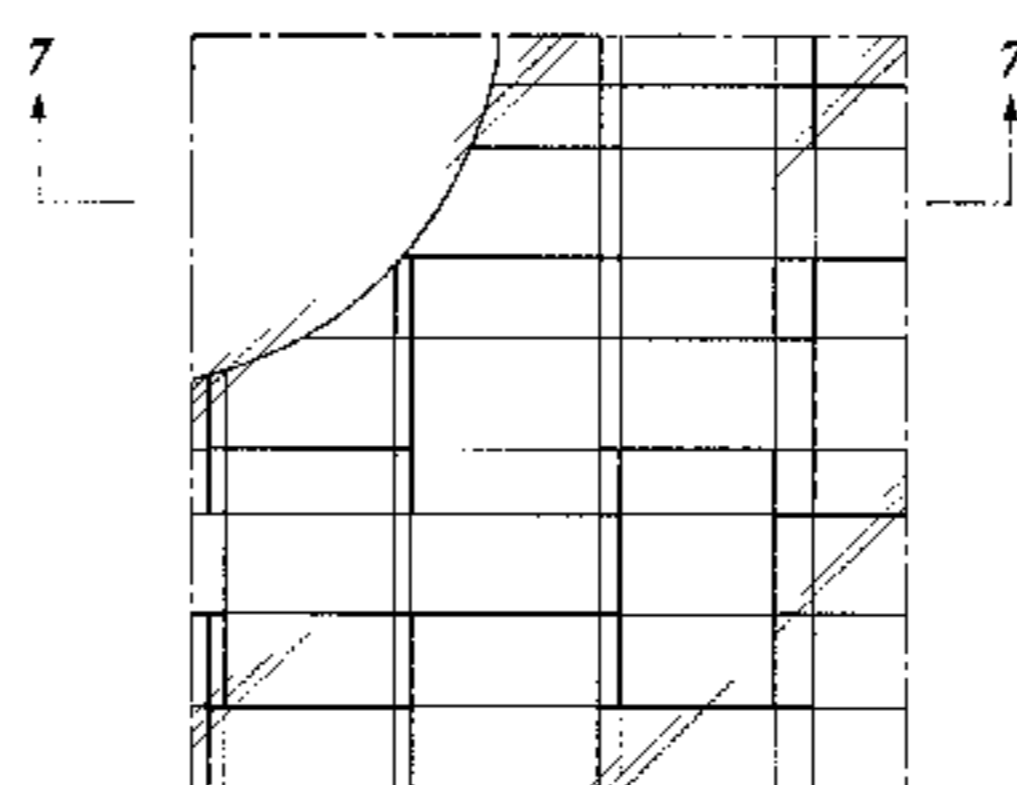

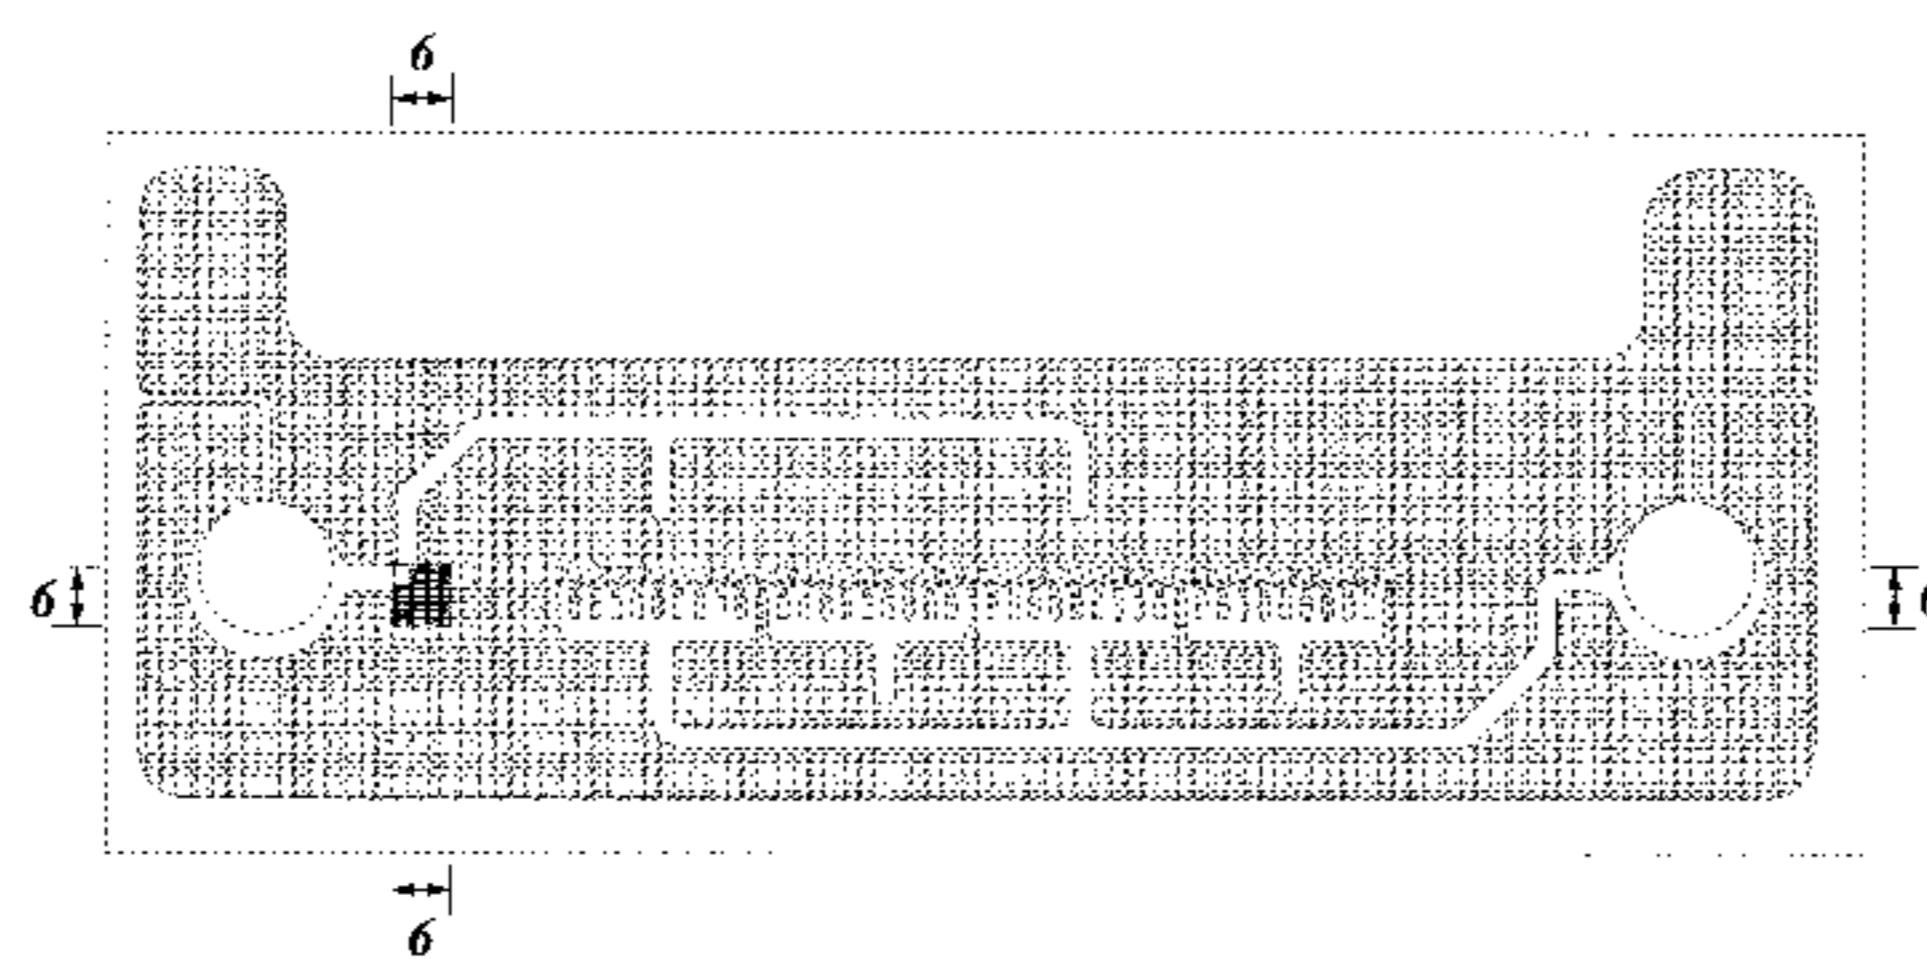

The ornamental design for a wiring board, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a wiring board showing our new design;
 FIG. 2 is a top plan view thereof;
 FIG. 3 is a bottom plan view thereof;
 FIG. 4 is a right side view thereof;
 FIG. 5 is a left side view thereof;
 FIG. 6 is an enlarged front view of a portion taken along lines 6-6 in FIG. 1; and,
 FIG. 7 is an enlarged cross sectional view taken along line 7-7 in FIG. 6.

The features shown in broken lines in the drawings depict environmental subject matter only and form no part of the claimed design. The dashed-dotted lines in FIGS. 1 and 6 denote the boundary of the claim and form no part of the claimed design. All sides not shown form no part of the claimed design.

1 Claim, 7 Drawing Sheets

FIG. 1

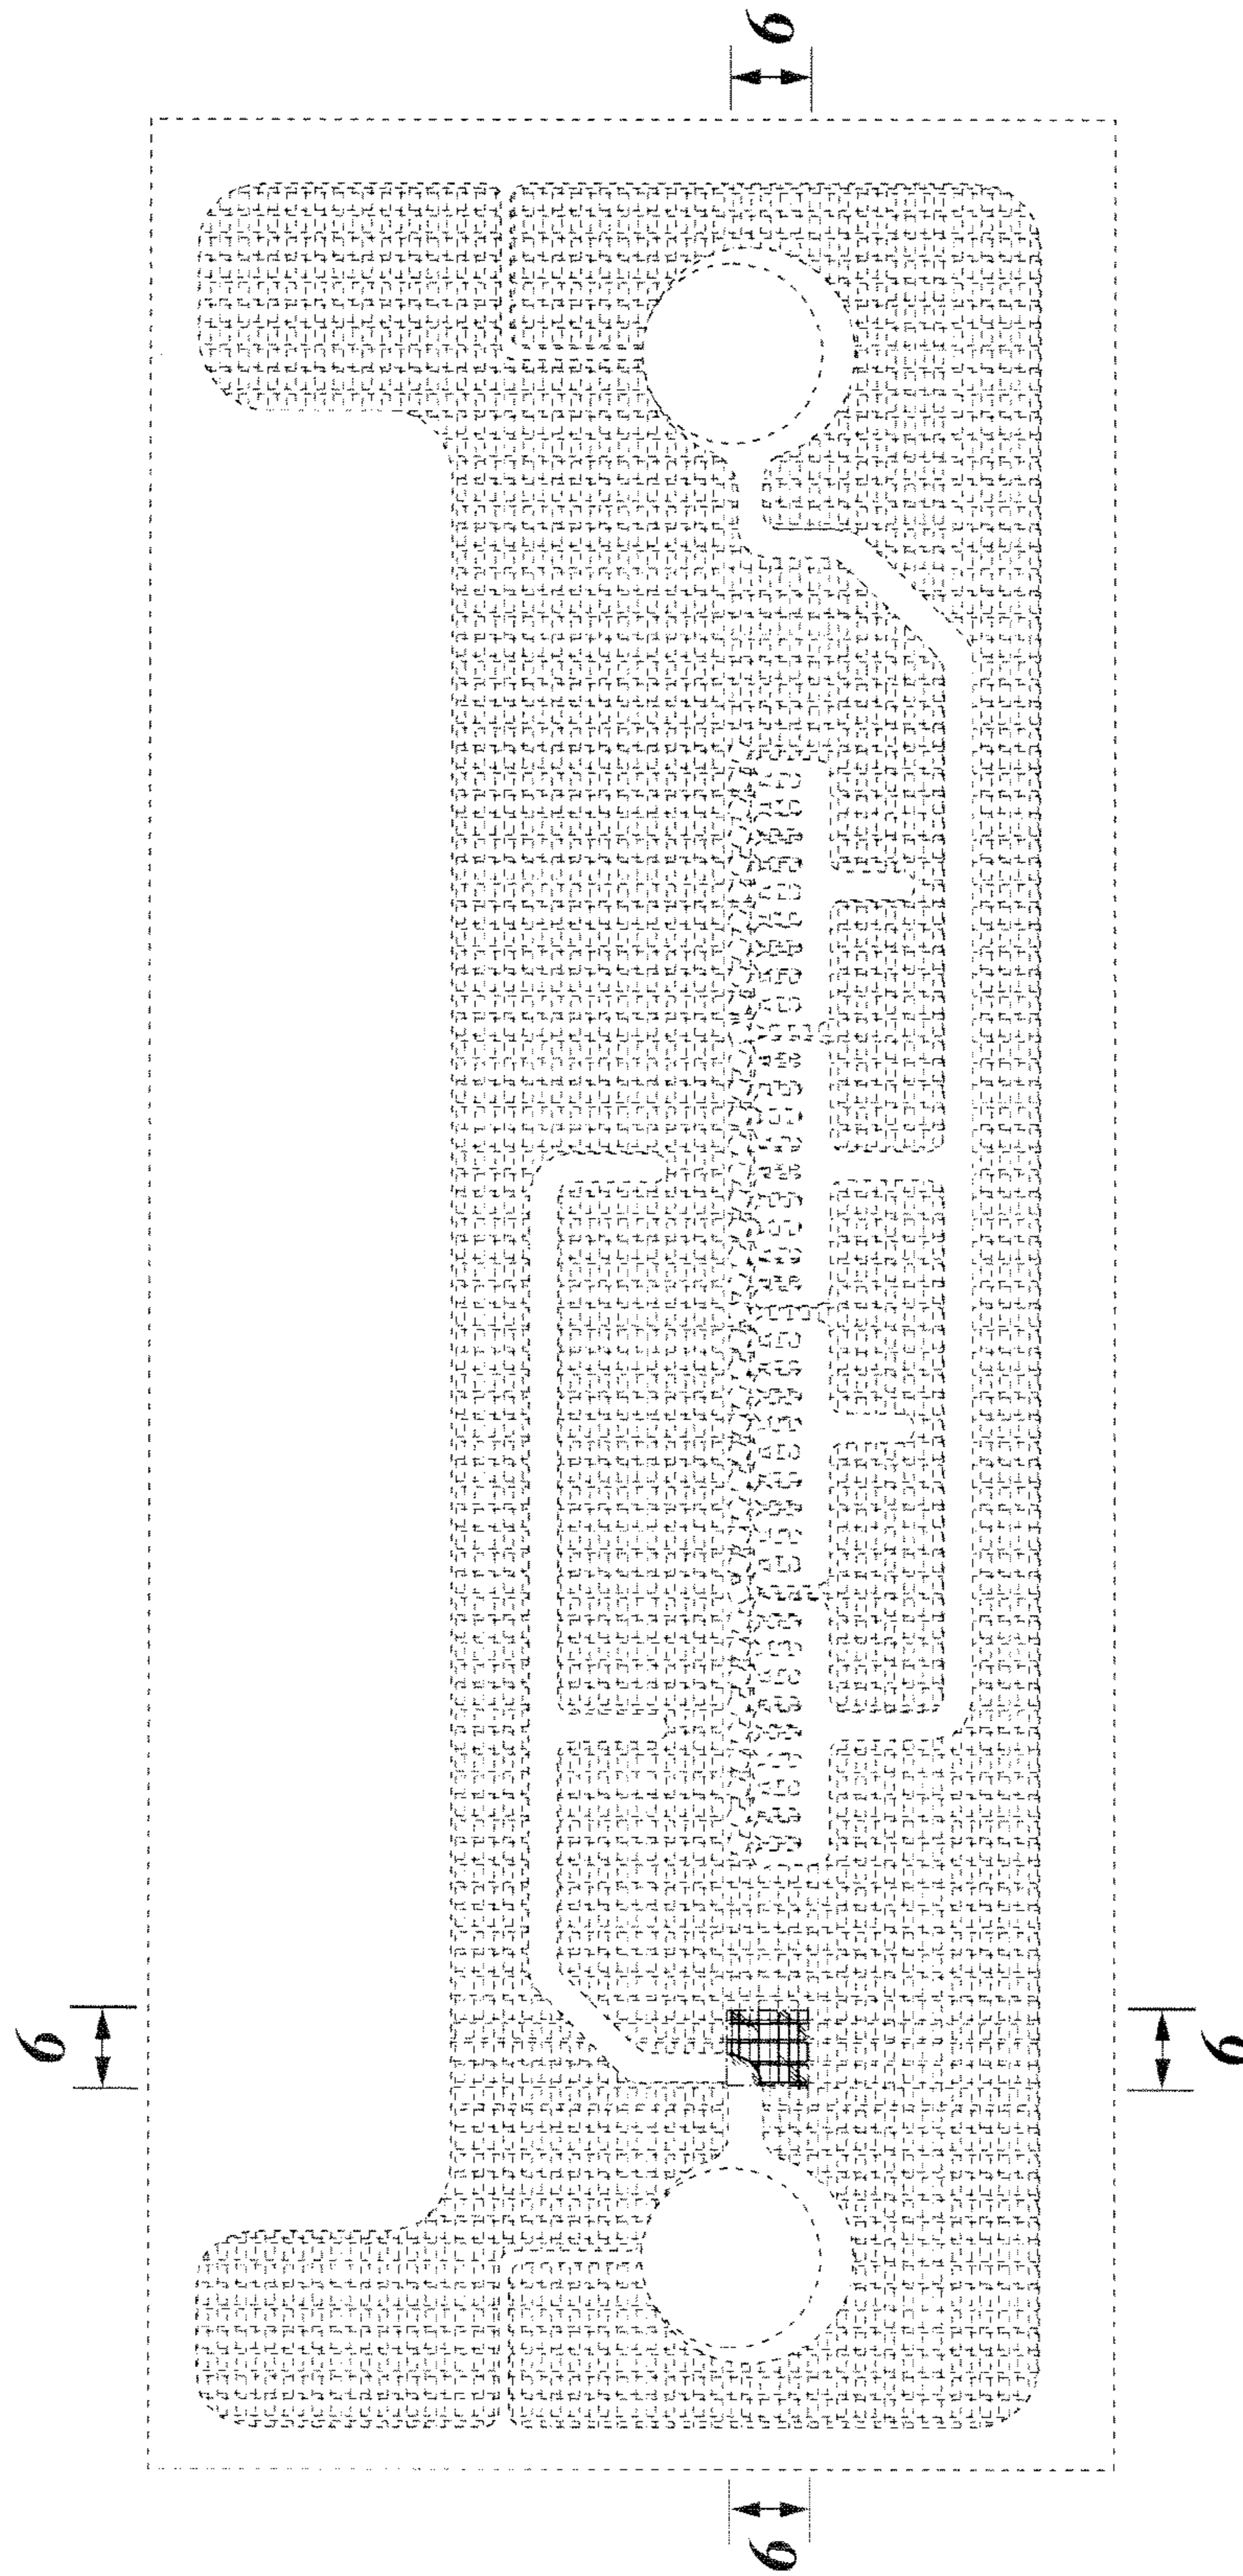

FIG. 2

FIG. 2 is a perspective view of a decorative element, such as a door pull or handle, in a closed position. The element is elongated and has a curved, hook-like shape. It features a series of small, rectangular protrusions along its length, which are arranged in a regular, repeating pattern. The element is shown in a perspective view, with the top and side surfaces visible. The protrusions are located on the top surface of the element. The element is shown in a closed position, with the hook-like end pointing downwards and to the right. The element is shown in a perspective view, with the top and side surfaces visible. The protrusions are located on the top surface of the element. The element is shown in a closed position, with the hook-like end pointing downwards and to the right.
