(57) **CLAIM**

The ornamental design for a video conference system light reflector, as shown and described.

DESCRIPTION

This application is related to the following commonly owned and co-pending design patent applications: "Display Screen Module," filed Mar. 26, 2012 (29/416,712); "Video Conference System," filed Mar. 26, 2012 (29/416,717), and "Video Conference System," filed Mar. 26, 2012 (29/416,718). These applications are hereby incorporated by reference herein in their entireties.

FIG. **1** is a front, left perspective view from above of a video conference system light reflector according to the present invention;

FIG. **2** is a top plan view of the video conference system light reflector of FIG. **1**;

FIG. **3** is a bottom plan view of the video conference system light reflector of FIG. **1**;

FIG. **4** is a front elevation view of the video conference system light reflector of FIG. **1**;

FIG. **5** is a rear elevation view of the video conference system light reflector of FIG. **1**;

FIG. **6** is a right side elevation view of the video conference system light reflector of FIG. **1**;

FIG. **7** is a left side elevation view of the video conference system light reflector of FIG. **1**;

FIG. **8** is an enlarged front perspective view of an upper-left section of the video conference system light reflector of FIG. **1**;

FIG. **9** is an enlarged side elevation view of an upper-left section of the video conference system light reflector of FIG. **1**; and,

FIG. **10** is another front, left perspective view from above of the video conference system light reflector of FIG. **1** shown with a display screen module.

The broken lines shown in the drawings illustrate portions of the video conference system and form no part of the claimed design.

1 Claim, 8 Drawing Sheets
