(57) **CLAIM**

The ornamental design for a display screen with an animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a first embodiment showing a front view of the first image in a sequence for a display screen with an animated graphical user interface.

FIG. 2 is a front view of the second image in the same sequence as FIG. 1.

FIG. 3 is a front view of the third image in the same sequence as FIG. 1.

FIG. 4 is a front view of the fourth image in the same sequence as FIG. 1.

FIG. 5 is a front view of the fifth image in the same sequence as FIG. 1.

FIG. 5 is a second embodiment showing a front view of the first image in another sequence for a display screen with an animated graphical user interface.

FIG. 4 is a front view of the second image in the same sequence as FIG. 5.

FIG. 3 is a front view of the third image in the same sequence as FIG. 5.

FIG. 2 is a front view of the fourth image in the same sequence as FIG. 5; and,

FIG. 1 is a front view of the fifth image in the same sequence as FIG. 5.

The broken lines in the figures, including the broken lines of the border showing the remainder of the display screen, the broken lines of text, and the icons in broken lines, all illustrate unclaimed environment and form no part of the claimed design.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1 through 5 in one embodiment of the new design, and sequentially transitions between the images shown in FIGS. 5 through 1 in a second embodiment of the new design. No ornamental aspects are associated with the process or period in which one image transitions to another image.
