(57) **CLAIM**

The ornamental design for a display panel or portion thereof with a transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a first image in a sequence according to my new design; and, FIG. 2 is a front view of a second image in the sequence. The subject matter in this patent includes a process or period during which an image changes into another image. This process or period in which one image transitions into another form no part of the claimed design. The broken lines shown in the drawings represent portions of the display panel or portion thereof with transitional graphical user interface which form no part of the claimed design.
