FIG. 1 is a front, top, left isometric view of the new design with the closure in a closed position.

FIG. 2 is a rear, top, right isometric view of the new design with the closure in a closed position.

FIG. 3 is a top view of the new design with the closure in a closed position.

FIG. 4 is a top view of the new design with the closure in an open position; and,

FIG. 5 is a rear, top, left isometric view of the new design with the closure in a closed position, shown together with an associated liquid container.

The dashed lines shown in the drawings illustrate portions of the closure (e.g., the rear portion of the closure) that form no part of the presently claimed design (FIGS. 1-5) and illustrate environmental structure of an associated cap (FIGS. 1-5) and of an associated liquid container (FIG. 5) that form no part of the presently claimed design. The dash-dot lines shown in the drawings define a rear boundary of the claimed portion of the closure. In FIGS. 1-2 and 5, portions of the cap are illustrated as if they were transparent, so as not to obstruct illustrating portions of the claimed closure. The shading lines shown in the drawings represent the approximate three-dimensional contour of the claimed design and are not intended to indicate surface decoration.
