(57) **CLAIM**

The ornamental design for a “storage container with access panel,” as shown and described.

**DESCRIPTION**

FIG. 1 is a front and right side perspective view of a storage container with access panel, showing the front, right, and top sides of our new design, according to one embodiment;

FIG. 2 is a top plan view of the storage container with access panel shown in FIG. 1;

FIG. 3 is a bottom plan view of the storage container with access panel shown in FIG. 1;

FIG. 4 is a left side elevational view of the storage container with access panel shown in FIG. 1;

FIG. 5 is a right side elevational view of the storage container with access panel shown in FIG. 1;

FIG. 6 is a front side elevational view of the storage container with access panel shown in FIG. 1;

FIG. 7 is a back side elevational view of the storage container with access panel shown in FIG. 1;

FIG. 8 is a front and right side perspective view of the storage container with access panel shown in FIG. 1, showing an access panel in an alternate or open position;

FIG. 9 is an exploded front and right side perspective view of the storage container with access panel shown in FIG. 1, showing a lid in an alternate or removed position;

FIG. 10 is a front and right side perspective view of the storage container with access panel, according to another embodiment, the left view being a mirror image to that shown in FIG. 10, and the bottom view being identical to that shown in FIG. 3;

FIG. 11 is a back side elevational view of the storage container with access panel shown in FIG. 10;

FIG. 12 is a front and right side perspective view of the storage container with access panel, according to yet another embodiment, the left view being a mirror image to that shown in FIG. 12, and the bottom view being identical to that shown in FIG. 3;

FIG. 13 is a bottom plan view of the storage container with access panel shown in FIG. 12;

FIG. 14 is a front and right side perspective view of the storage container with access panel, according to yet another embodiment, the left view being a mirror image to that shown in FIG. 14;

FIG. 15 is a back side elevational view of the storage container with access panel shown in FIG. 14; and,

FIG. 16 is a bottom plan view of the storage container with access panel shown in FIG. 14.

The even broken lines represent portions of the storage container that form no part of the claimed design. The break lines immediately adjacent to the claimed areas, shown in FIGS. 10-16, indicate that any portion of the article beyond what is shown forms no part of the claimed design.
