(57) **CLAIM**

The ornamental design for a biometric monitor, as shown and
described.

DESCRIPTION

The patent or application file contains at least one drawing
executed in color. Copies of this patent or patent application
publication with color drawings will be provided by the
Office upon request and payment of the necessary fee.

FIG. 1 is a front perspective view of a biometric monitor,
showing our new design, and wherein the biometric monitor
is in operational mode with optical emitters therewithin illu-
minated and emitting green and yellowish-orange light;

FIG. 2 is a front view of the biometric monitor in opera-
tional mode with optical emitters therewithin illuminated and emit-
ting green and yellowish-orange light;

FIG. 3 is a front view of another embodiment of a biometric
monitor, showing our new design, and wherein the biometric
monitor is in operational mode with optical emitters there-
within illuminated and emitting green and yellowish-orange
light; and,

FIG. 4 is a front view of another embodiment of a biometric
monitor, showing our new design, and wherein the biometric
monitor is in operational mode with optical emitters there-
within illuminated and emitting green and yellowish-orange
light.

The broken lines shown herein are for illustrative purposes
only and form no part of the claimed design. Shading in the
three circular areas of FIGS. 1-3 indicate the respective colors
of light emanating from optical emitters within the biometric
monitor during illumination operation thereof (green for two
top emitters and yellowish-orange for bottom emitter).

1 Claim, 4 Drawing Sheets
