(57) **CLAIM**

The ornamental design for a portion of a display panel with a computer generated display of a slider, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a portion of a display panel with a computer generated display of a slider showing my new design of a slider for an up operation; and, FIG. 2 is a front view of a portion of the display panel with a computer generated display of a slider showing another embodiment of my new design of a slider for a down operation.

The broken lines showing a portion of the display panel are included for the purpose of illustrating environmental structure and form no part of the claimed design.

The illustrated design may be included on a portion of a display panel with a computer generated image such as, for example, generated from software, generated in compiling and computer processing of data, generated in updating and correcting data, generated in transmission of information and data, provided online from a database, and generated in transmission of information and data via a computer network such as the Internet.
