US00D723584S

(12) United States Design Patent

Van Slembrouck

(10) Patent No.: US D723,584 S
(45) Date of Patent: ** *Mar. 3, 2015

(54) **PORTION OF A DISPLAY WITH A TRANSITIONAL GRAPHICAL USER INTERFACE**

(75) Inventor: **Justin Van Slembrouck**, New York, NY (US)

(73) Assignee: **Adobe Systems Incorporated**, San Jose, CA (US)

(*) Notice: This patent is subject to a terminal disclaimer.

(**) Term: **14 Years**

(21) Appl. No.: **29/419,175**

(22) Filed: **Apr. 25, 2012**

(57) **CLAIM**

The ornamental design for a portion of a display with a transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is a front view of a first state in a sequence for a portion of a display with a transitional graphical user interface, showing my new design.
FIG. **2** is front view of a second state in the sequence for the portion of the display with the transitional graphical user interface.
FIG. **3** is an enlarged front view of the first state in the sequence, illustrating a first embodiment of the first state in the sequence.
FIG. **4** is an enlarged front view of the second state in the sequence, illustrating a first embodiment of the second state in the sequence.
FIG. **5** is an enlarged front view of the first state in the sequence, illustrating a second embodiment of the first state in the sequence.
FIG. **6** is an enlarged front view of the second state in the sequence, illustrating a second embodiment of the second state in the sequence.
FIG. **7** is an enlarged front view of the first state in the sequence, illustrating a third embodiment of the first state in the sequence.
FIG. **8** is an enlarged front view of the second state in the sequence, illustrating a third embodiment of the second state in the sequence.
FIG. **9** is a front view of the first state in the sequence for the portion of the display with the transitional graphical user interface, illustrating a fourth embodiment of the first state in the sequence.
FIG. **10** is a front view of the second state in the sequence for the portion of the display with the transitional graphical user interface, illustrating a fourth embodiment of the second state in the sequence.
FIG. **11** is an enlarged front view of the first state in the sequence, illustrating the fourth embodiment of the first state of the sequence.
FIG. **12** is an enlarged front view of the second state in the sequence, illustrating the fourth embodiment of the second state of the sequence.
FIG. **13** is an enlarged front view of the first state of the sequence, illustrating a fifth embodiment of the first state of the sequence.
FIG. **14** is an enlarged front view of the second state of the sequence, illustrating a fifth embodiment of the second state of the sequence.
FIG. **15** is an enlarged front view of the first state of the sequence, illustrating a sixth embodiment of the first state of the sequence; and,
FIG. **16** is an enlarged front view of the second state of the sequence, illustrating a sixth embodiment of the second state of the sequence.
The appearance of the portion of the transitional graphical user interface sequentially transitions between the images shown in FIG. **1-2**. The appearance of the first embodiment of the portion of the display with the transitional graphical user interface sequentially transitions between the images shown in FIG. **3-4**. The appearance of the second embodiment of the portion of the display with the transitional graphical user interface sequentially transitions between the images shown in FIG. **5-6**. The appearance of the third embodiment of the portion of the display with the transitional graphical user interface sequentially transitions between the images shown in FIG. **7-8**. The process or period in which any image transitions to another image forms no part of the claimed design.
The appearance of the fourth embodiment of the portion of the display with the transitional graphical user interface sequentially transitions between the images shown in FIG. **9-10** and between the images shown in FIG. **11-12**. The appearance of the fifth embodiment of the portion of the display with the transitional graphical user interface sequentially transitions between the images shown in FIG. **13-14**. The appearance of the sixth embodiment of the portion of the display with the transitional graphical user interface sequentially transitions between the images shown in FIG. **15-16**. The process or period in which any images transitions to another image forms no part of the claimed design.
Subject matter shown in broken lines is environmental and forms no part of the claimed design.
