(57) **CLAIM**

The ornamental design for a pneumatic tire, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a pneumatic tire showing our new design.

FIG. 2 is a front elevational view thereof; and,

FIG. 3 is a side elevational view thereof, the other side being a mirror image.

In the drawings, the broken lines defining the sidewall, and inner bead depict environmental subject matter that forms no part of the claimed design. The dash-dot-dot-dash pattern represents the peripheral boundary of the unclaimed sidewall.

The tread pattern is understood to repeat uniformly throughout the circumference of the tire, as shown schematically in solid lines.
