(57) **CLAIM**

The ornamental design for a display screen with multistate graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a first state of a display screen with multistate graphical user interface showing the new design; and, FIG. 2 is a second state of a display screen with multistate graphical user interface showing the new design. The appearance of the display screen with multistate user interface transitions between the images shown in FIGS. 1-2 responsive to user input selecting one of the two mobile device images. The process or period in which one image transitions to another forms no part of the claimed design. The broken line showing of the display screen and housing is for environmental purposes only and forms no part of the claimed design.
