See application file for complete search history.

FIG. 1 is a perspective view of a tire tread showing our new
design, it being understood that the tread pattern repeats
circumferentially throughout the outer circumference and
shoulder of the tire, the opposite side perspective being iden-
tical thereto;

FIG. 2 is a front elevation view thereof; and

FIG. 3 is a side elevation view of the right side thereof, the left
side elevation being identical thereto.

In the drawings, the recessed groove portions of the tire tread
having a depth is best illustrated along the top and bottom
edges of FIG. 2. In the drawings, the broken line disclosure of
the tire sidewall and inner bead depicts environmental struc-
ture and forms no part of the claimed design.
