(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of the display screen with transitional graphical user interface; FIG. 2 is a front view of a second image in the sequence; FIG. 3 is an enlarged front view of a third image in the sequence; FIG. 4 is an enlarged front view of a fourth image in the sequence; and, FIG. 5 is an enlarged front view of a fifth image in the sequence.

The subject matter in this patent includes a process or period during which an image sequentially transitions between the images shown in FIGS. 1-5. This process or period forms no part of the claimed design.

The broken lines including the showing of the display screen of a communications terminal surrounding the illustrated design, the add-text prompt (“+”), all text, the call-out for the interactive component having the text “MENU,” and certain corners of the interface components so-illustrated, are included for the purpose of illustrating the environment and form no part of the claimed design.
