(57) **CLAIM**

The ornamental design for an automated drum packing module, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a automated drum packing module according to an embodiment of the invention;
 FIG. 2 is a back view of a automated drum packing module according to an embodiment of the invention;
 FIG. 3 is a left view of a automated drum packing module according to an embodiment of the invention;
 FIG. 4 is a right view of a automated drum packing module according to an embodiment of the invention;
 FIG. 5 is a top view of a automated drum packing module according to an embodiment of the invention;
 FIG. 6 is an isometric front right view of a automated drum packing module according to an embodiment of the invention;
 FIG. 7 is an isometric front left view of a automated drum packing module according to an embodiment of the invention;
 FIG. 8 is an isometric back right view of a automated drum packing module according to an embodiment of the invention; and,
 FIG. 9 is an isometric back left view of a automated drum packing module according to an embodiment of the invention.
 The broken lines showing the general outline of the container in FIGS. 1 to 9 illustrate portions of the design that form no part of the claim.
