(57) **CLAIM**

The ornamental design for a stopcock status indicator, as shown and described.

DESCRIPTION

- FIG. 1 is a perspective view of the stopcock status indicator.
- FIG. 2 is a left side view of the invention.
- FIG. 3 is a front elevation view of the invention.
- FIG. 4 is a right side view of the invention.
- FIG. 5 is a rear elevation view of the invention.

- FIG. 6 is a top plan view of the invention with an indicator portion in a first position.
 - FIG. 7 is a top plan view of the invention with an indicator portion in a second position.
 - FIG. 8 is a top plan view of the invention with an indicator portion in a third position.
 - FIG. 9 is a top plan view of the invention with an indicator portion in a fourth position.
 - FIG. 10 is a top plan view of the invention with an indicator portion in a fifth position.
 - FIG. 11 is a top plan view of the invention with an indicator portion in a sixth position.
 - FIG. 12 is a top plan view of the invention with an indicator portion in a seventh position.
 - FIG. 13 is a top plan view of the invention with an indicator portion in an eighth position.
 - FIG. 14 is a perspective view of a second embodiment of the stopcock status indicator.
 - FIG. 15 is a left side view of the invention.
 - FIG. 16 is a front elevation view of the invention.
 - FIG. 17 is a right side view of the invention.
 - FIG. 18 is a rear elevation view of the invention.
 - FIG. 19 is a top plan view of the invention with an indicator portion in a first position.
 - FIG. 20 is a top plan view of the invention with an indicator portion in a second position.
 - FIG. 21 is a top plan view of the invention with an indicator portion in a third position.
 - FIG. 22 is a top plan view of the invention with an indicator portion in a fourth position.
 - FIG. 23 is a top plan view of the invention with an indicator portion in a fifth position.
 - FIG. 24 is a top plan view of the invention with an indicator portion in a sixth position.
 - FIG. 25 is a top plan view of the invention with an indicator portion in a seventh position.
 - FIG. 26 is a top plan view of the invention with an indicator portion in an eighth position; and,
 - FIG. 27 is another top plan view of the second embodiment.
- The broken lines in the drawings are included for the purpose of illustrating elements of the stopcock status indicator and form no part of the claimed design.

1 Claim, 5 Drawing Sheets
