(57) **CLAIM**

The ornamental design for a vehicle dashboard disk to receive a device mounting apparatus, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the disk; particularly showing the features on the inner surface of the sides of the disk.

FIG. 2 is a bottom view of the disk.

FIG. 3 is a side view of the disk; and,

FIG. 4 is a side view of the disk showing, for reference purposes, the device mounting apparatus when docked in the disk. Portions of FIG. 4 are shown in dashed lines for illustrative purposes only and form no part of the claimed design. The design comprises a disk arranged to be affixed to a vehicle dashboard and into which a device mounting apparatus can be removably inserted. The mounting apparatus, optionally an active vehicle mount, is preferably arranged to support an electronic portable device. The device is preferably for use in providing travel and traffic information to a user.
