The ornamental design for an upper torso garment with plurality of access seams, as shown and described.

DESCRIPTION

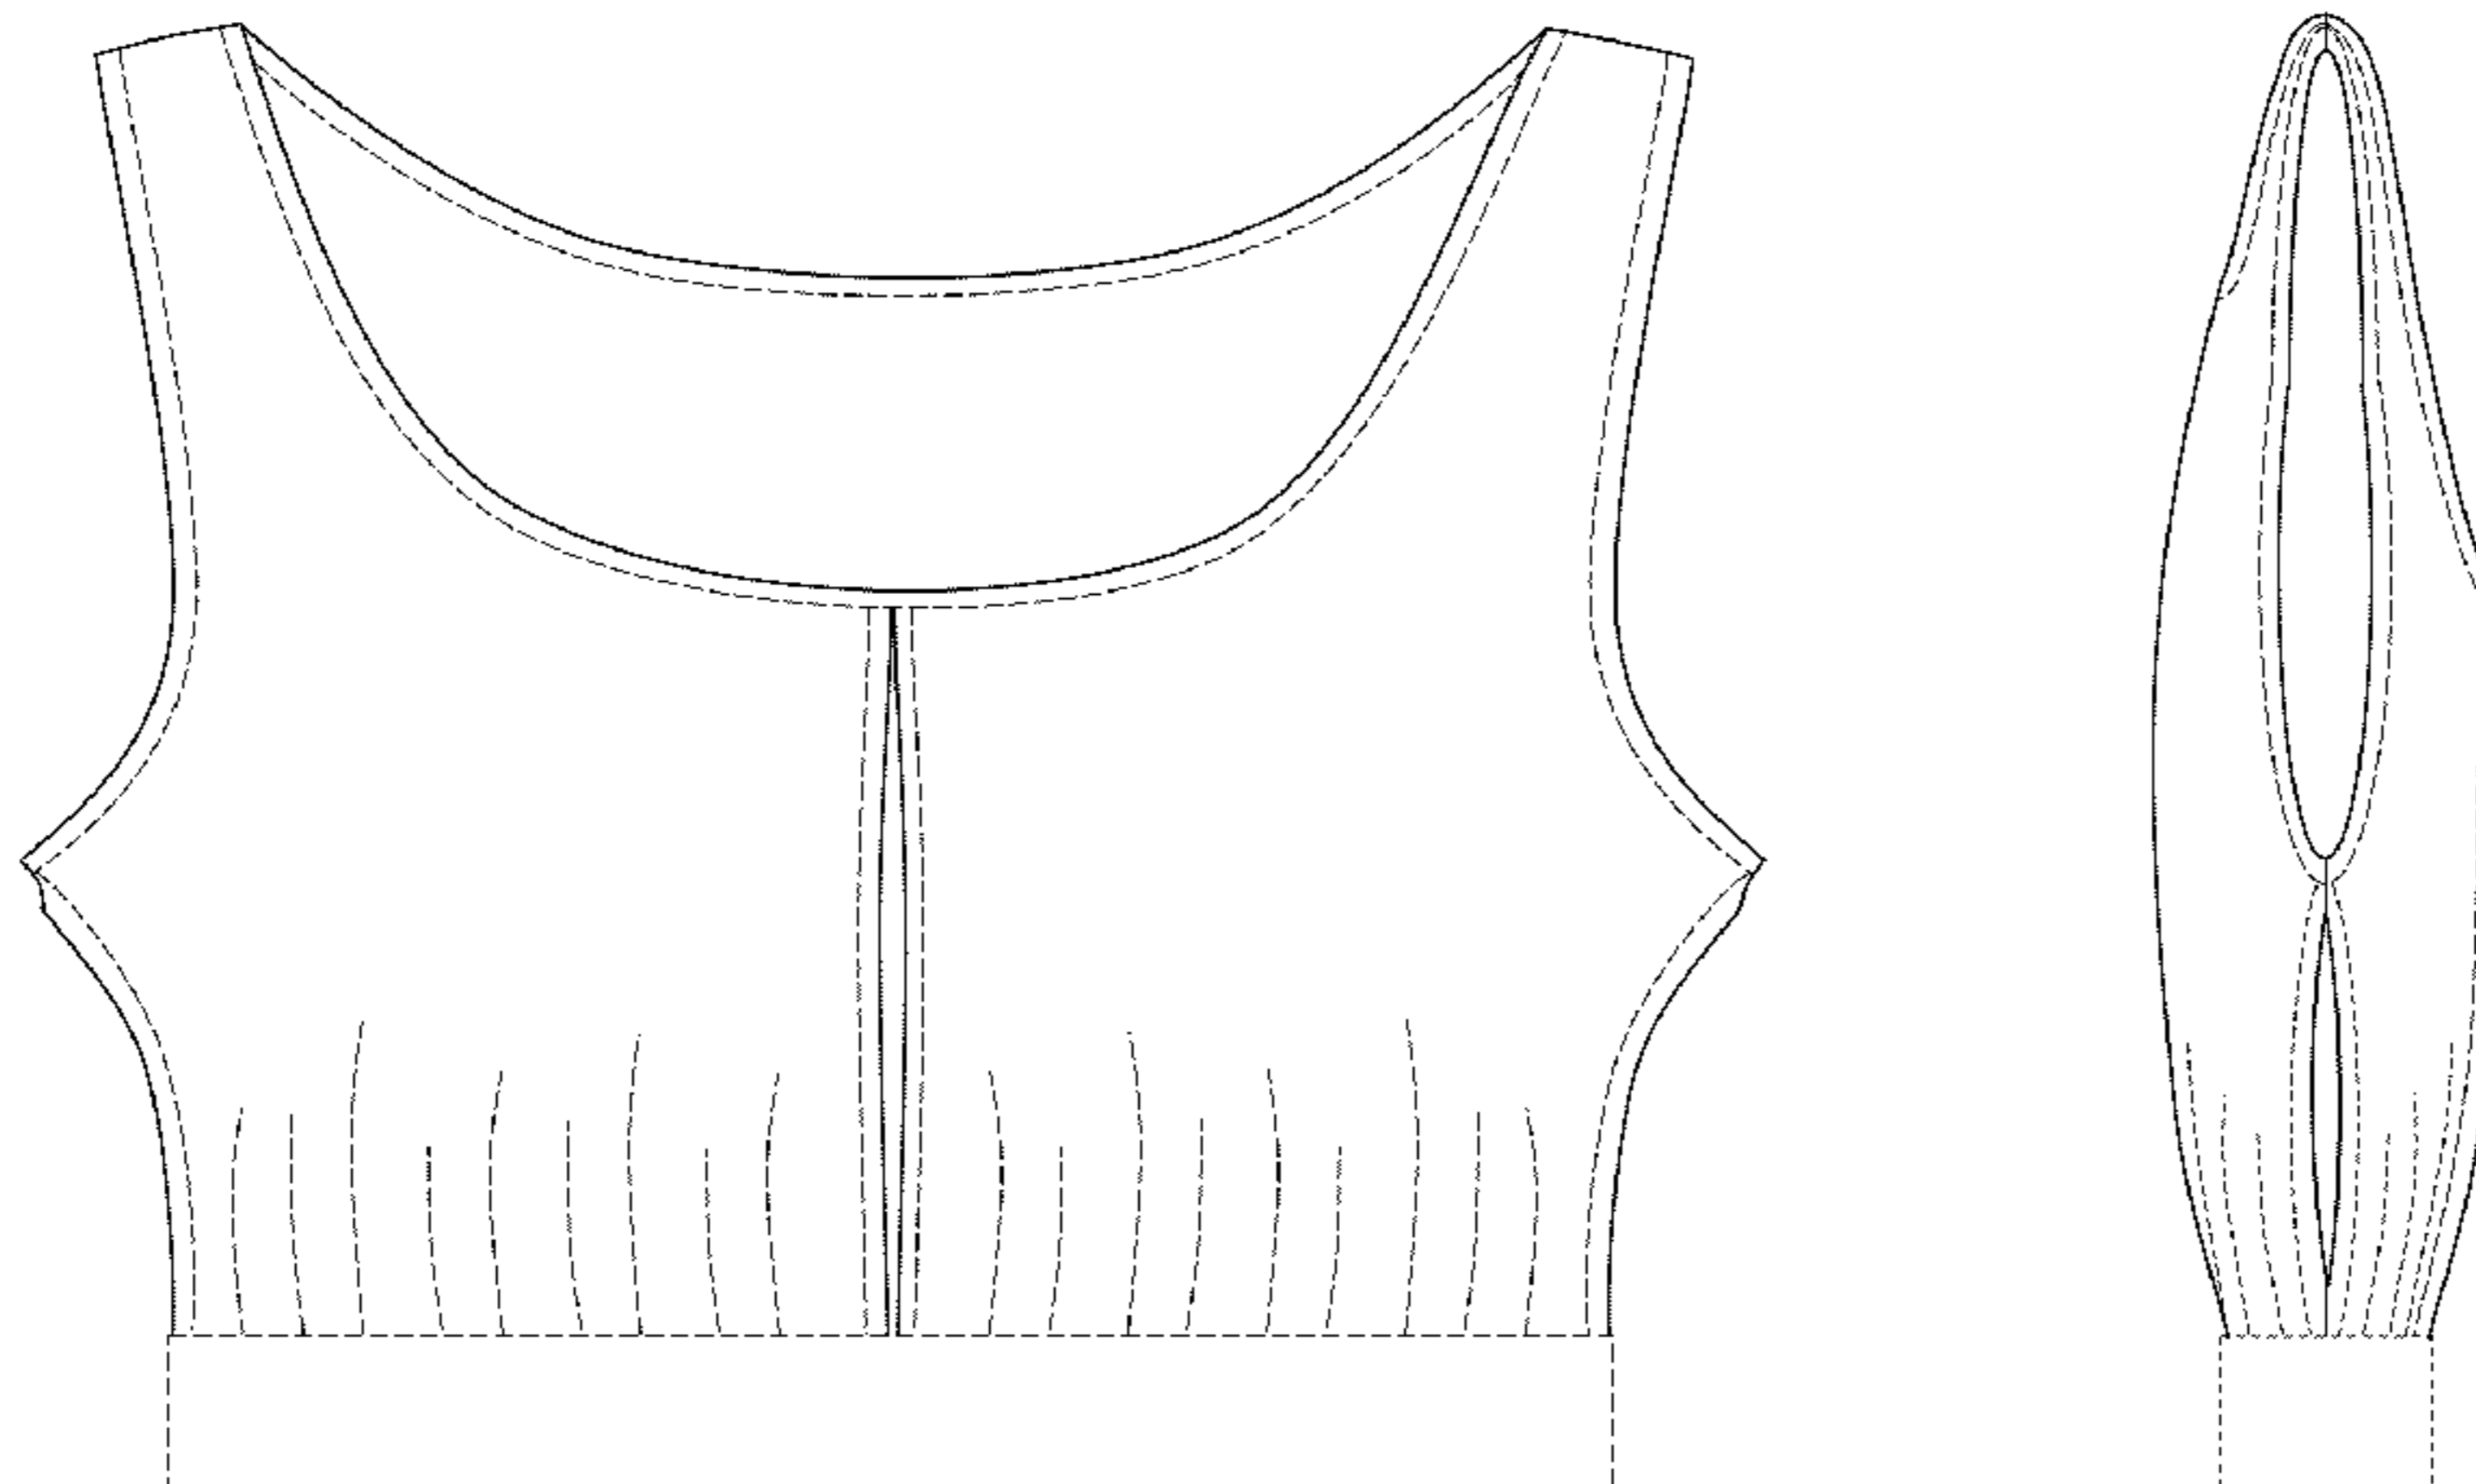

FIG. 1 is a top plan view of an upper torso garment with plurality of access seams;
FIG. 2 is a front elevational view thereof;
FIG. 3 is a bottom plan view thereof;
FIG. 4 is a right-side elevational view thereof, the left-side elevational view being a mirror image thereof;
FIG. 5 is a rear elevational view thereof; and,
FIG. 6 is an isometric view thereof, showing our design being used.

The partial human figure shown in broken lines in the drawings represents environmental subject matter intended to illustrate how the garment appears when worn, and forms no part of the claimed design.

The broken lines shown immediately adjacent to the neck and arm openings, as well as the access openings, are stitching and form a part of the claimed design. All remaining broken lines on the garment are unclaimed features of the article of manufacture.

The claimed upper torso garment with plurality of access seams is used by persons who need to take a shower where other people are present, and want additional privacy.
