(57) **CLAIM**

The ornamental design for an electrical connector, as shown and described.

**DESCRIPTION**

FIG. 1 is a top perspective view of a first embodiment of an electrical connector showing our new design.

FIG. 2 is a bottom perspective view of the electrical connector.

FIG. 3 is a top view of the electrical connector.

FIG. 4 is a bottom view of the electrical connector.

FIG. 5 is a side view of a first side of the electrical connector.

FIG. 6 is a side view of a second side of the electrical connector.

FIG. 7 is a side view of a third side of the electrical connector; and,

FIG. 8 is a side view of a fourth side of the electrical connector.

The surfaces are lined for contour only and no claim is made to any particular surface texture. The broken lines shown in the figures that are immediately adjacent to the shaded areas and define edges or regions that are unshaded, represent the bounds of the claim, while all other broken lines are directed to portions of the electrical connector that do not form a part of the claimed design. The broken lines form no part of the claimed design.
