FIG. 1 is a front view of a first image in a sequence for a display screen with graphical user interface with interleaved rows of text and reduced error key layout short reach showing my new design.

FIG. 2 is a front view of a second image in a sequence for a display screen with graphical user interface with interleaved rows of text and reduced error key layout short reach showing my new design; and,

FIG. 3 is a front view of a third image in a sequence for a display screen with graphical user interface with interleaved rows of text and reduced error key layout short reach showing my new design.

The appearance of the display screen with graphical user interface with interleaved rows of text and reduced error key layout short reach transitions sequentially between the images shown in FIGS. 1-3. The process or period in which one image transitions to another image forms no part of the claimed design.

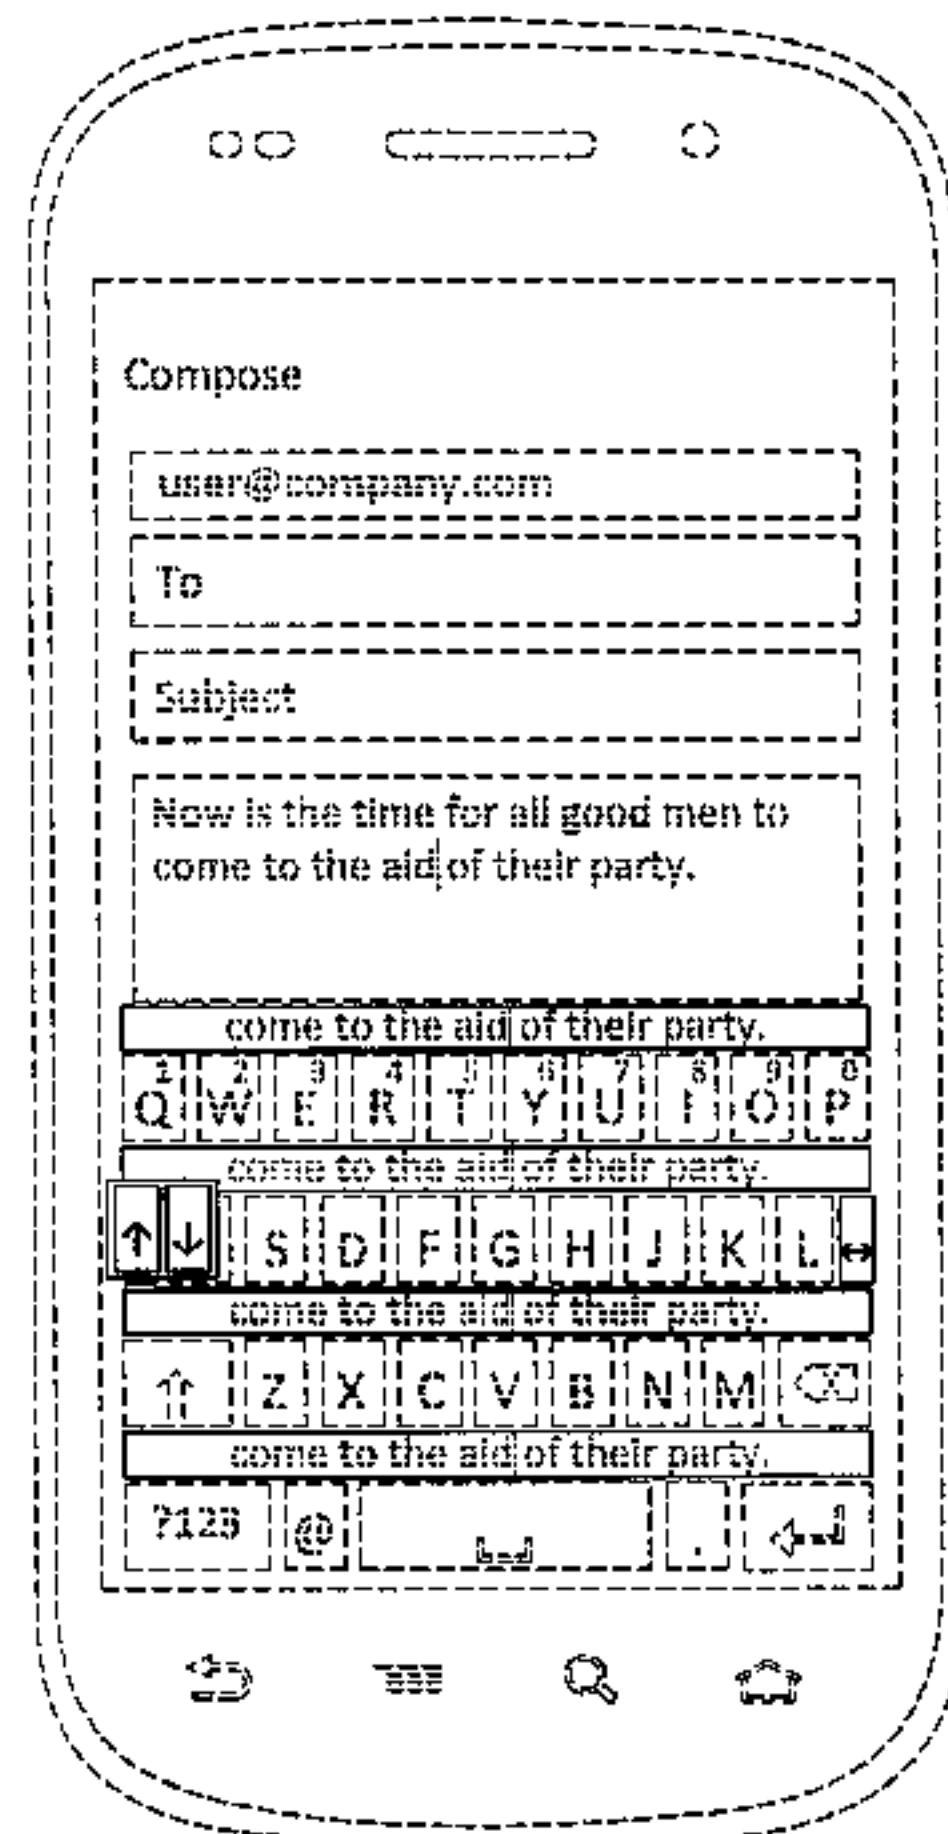

The broken lines within the solid lines depict portions of the display screen with graphical user interface with interleaved rows of text and reduced error key layout short reach that form no part of the claimed design. All other broken lines depict environmental subject matter that forms no part of the claimed design.
