(57) **CLAIM**

We claim the ornamental design for a television receiver display screen with graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first image of a television receiver display screen with graphical user interface showing our new design; and,

FIG. 2 is a front view of a second image thereof.

The subject matter of this design relates to the state of a character recognition pad being changed to a keyboard when selection is made from an input mode menu at the bottom of the graphical user interface thereof. The process or period of the change forms no part of the claimed design.

The broken lines shown in the drawings illustrate a television receiver display screen and form no part of the claimed design.
