(57) **CLAIM**

The ornamental design for a double shielded medical connector, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a double shielded medical connector showing my new design; FIG. 2 is perspective view thereof showing an opposing side; FIG. 3 is a front view thereof, the rear view, right-side view, and left-side view being mirror images; FIG. 4 is a top view thereof; FIG. 5 is a bottom view thereof; FIG. 6 is a sectional view through the section 6-6 of FIG. 5; FIG. 7 is a sectional view through the section 7-7 of FIG. 4; and, FIG. 8 is a partial sectional view through the section 8-8 of FIG. 3 further illustrating the helical structures visible in the bottom view.

The evenly-spaced broken line depiction of environmental structure represents the medical-fluid delivery device with which the design may be associated and forms no part of the claimed design. The underside of my new design contains no ornamental features and is not directly visible when integrated with the medical-fluid delivery device.
