(57) **CLAIM**

The ornamental design for a non-contact type data reader, as shown and described.

DESCRIPTION

FIG. 1 is a front elevation view of a first embodiment of a non-contact type data reader showing our new design; FIG. 2 is a front elevation view of a second embodiment of a non-contact type data reader showing our new design; FIG. 3 is a rear elevation view of the second embodiment; FIG. 4 is a right side elevation view of both embodiments, with the left side view being a mirror image thereof; and, FIG. 5 is a top plan view of both embodiments, with the bottom plan view being a mirror image thereof.

The broken line shown within the claimed design in the first embodiment, which is immediately adjacent to the shaded areas and defines an unshaded region, represents the inner boundaries of the first embodiment. All other broken lines show portions of the non-contact type data reader. The broken lines form no part of the claim in the embodiment in which they are shown. In both embodiments, the outer-most solid line represents the outer boundary of the claim.
