The ornamental design for a display screen with a transitional venous refill detection icon, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with a transitional venous refill detection icon showing the first image in a sequence.

FIG. 2 is a front view therefore showing a second image of the sequence.

FIG. 3 is a front view therefore showing a third image of the sequence.

FIG. 4 is a front view therefore showing a fourth image of the sequence.

FIG. 5 is a front view therefore showing a fifth image of the sequence.

FIG. 6 is a front view therefore showing a sixth image of the sequence.

FIG. 7 is a front view therefore showing a seventh image of the sequence.

FIG. 8 is a front view therefore showing an eighth image of the sequence.

FIG. 9 is a front view therefore showing a ninth image of the sequence.

FIG. 10 is a front view therefore showing a tenth image of the sequence.

FIG. 11 is a front view therefore showing an eleventh image of the sequence.

FIG. 12 is a front view therefore showing a twelfth image of the sequence.

FIG. 13 is a front view therefore showing a thirteenth image of the sequence.

FIG. 14 is a front view therefore showing a fourteenth image of the sequence.

FIG. 15 is a front view therefore showing a fifteenth image of the sequence.

FIG. 16 is a front view therefore showing a sixteenth image of the sequence.

FIG. 17 is a front view therefore showing a seventeenth image of the sequence.

FIG. 18 is a front view therefore showing an eighteenth image of the sequence.

FIG. 19 is a front view therefore showing a nineteenth image of the sequence.

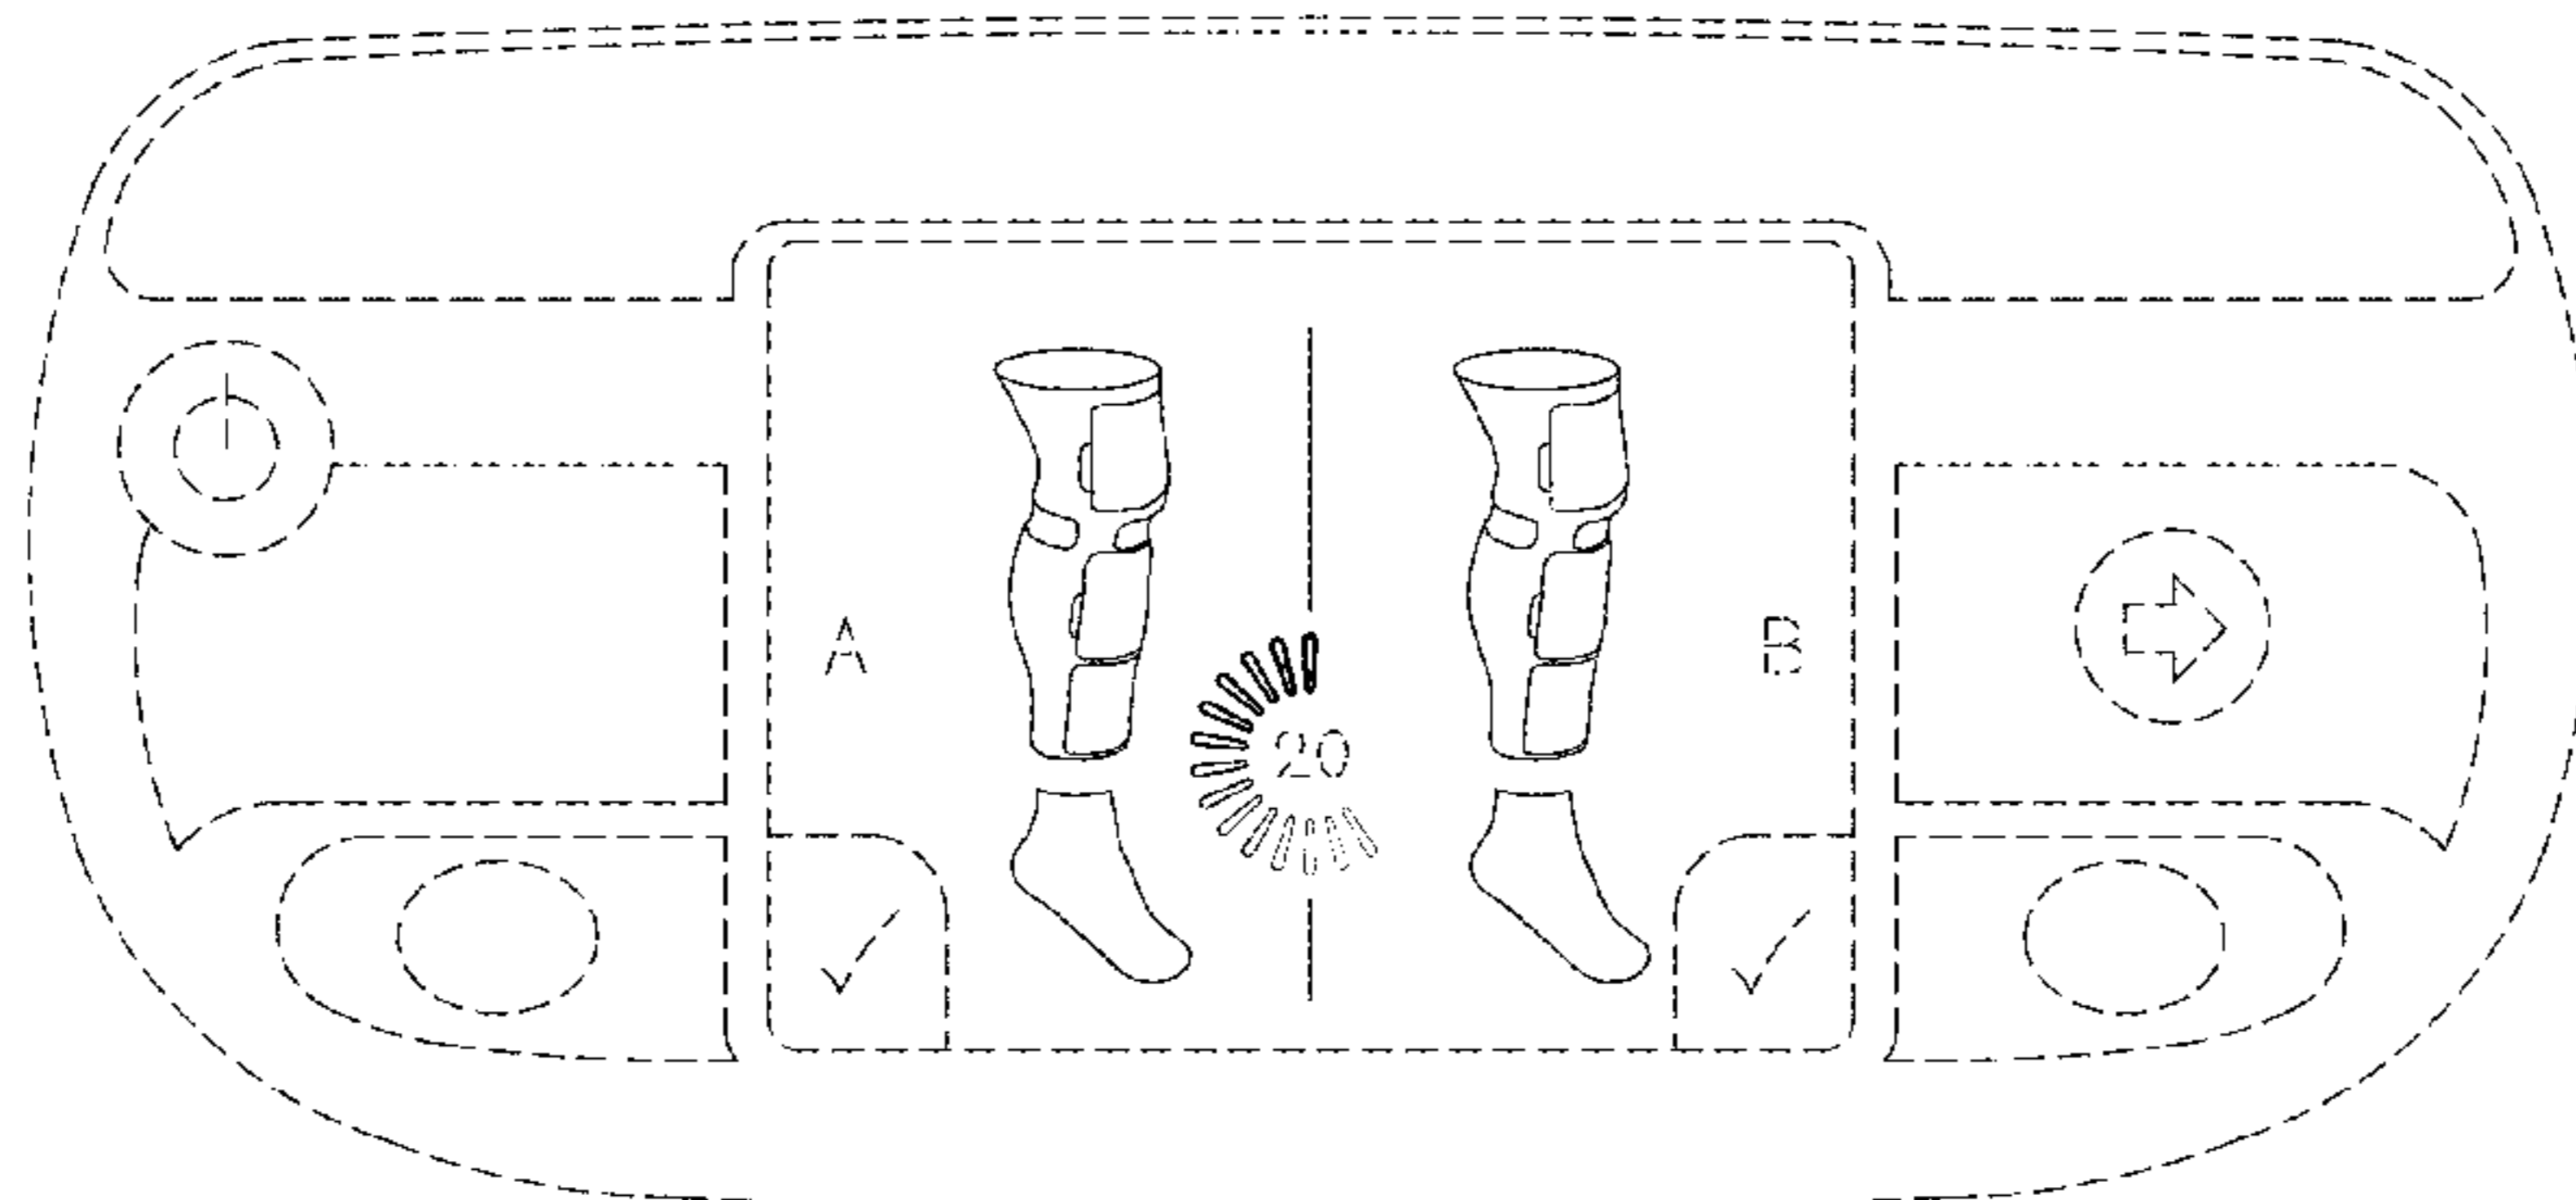

FIG. 20 is a front view therefore showing a twentieth image of the sequence.

FIG. 21 is a front view therefore showing a twenty first image of the sequence; and,

FIG. 22 is a front view therefore showing a twenty second image of the sequence.

The broken lines showing the display screen are included for the purpose of illustrating environmental structure and form no part of the claimed design.
