(57) **CLAIM**

The ornamental design for a mobile terminal with animated graphic user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence for a transitional mobile terminal with animated graphic user interface, showing my new design;

FIG. 2 is a front view of a second image thereof;

FIG. 3 is a front view of a third image thereof;

FIG. 4 is a front view of a fourth image thereof;

FIG. 5 is a front view of a fifth image thereof;

FIG. 6 is a front view of a sixth image thereof; and,

FIG. 7 is a front view of a seventh image thereof, in which a mobile terminal is shown in broken line to illustrate the article in a state of use.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1 through 6. The subject matter of this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

The broken lines of the mobile terminal, and all text, words, numbers, and symbols are for the purpose of illustrating portions of the article, and form no part of the claimed design. The dash-dot lines in the figures form a boundary of the claimed design, and form no part of the claimed design.
